nondeterministic control words in Forth 4—2286
nonprocedure language synthesis 4—9184

high level languages continued
NORMIN, implementation of the man-machine conversational mode using a normalized natural language 4—2303
Numericon 880-CNC high-level language 4—22484
OBE: a language for office and business automation 4—17892
Occam, distributed architecture based language to ease system design 4—17828
Occam, language based architecture for multiprocessor system design 4—13400
OCCAM program for generating raster display images 4—22445
Open Systems, modularity in design and standardisation 4—17332
ORBIT, object orientated programming in an applicative context 4—5840
OS/ES 6.1 system, modification 8, Robotron additional software facilities *(Czech)* 4—18028
P+ language 4—5824
parallel P-code for parallel PASCAL and other high-level languages 4—9214
parallel processes, interacting, language for description 4—22469
PEP: an interactive programming system with an Algol-like programming language 4—22554
persistent programming, PS-algol 4—9158
personal computers, instructions in machine code and BASIC programs 4—3569
PIC, command language for image processing *(German)* 4—9152
PICASO, CAD and descriptive geometry for school children 4—23655
PiL, Prolog in Lisp, automation language 4—22530
Pilot language in interactive programming 4—5814
PL/M-80, for 8-bit I8080 and I8085 microcomputers *(Czech)* 4—9191
PLOP predictive programming language for office procedure automation 4—22533
POPLOG, a programming environment based on POP-II 4—5804
portable programs *(Italian)* 4—22702
potential language standards 80 to 83 4—17847
problem description languages, quality *(German)* 4—5798
process control, function block programming and relay ladder logic 4—10281
program access control policies, extensions 4—9180
program system for SO-04 microcomputer and peripherals *(Russian)* 4—5825
programmable controllers, SIMATIC S5-135U 4—15968
programmable controllers and FODUS languages 4—15953
programming without programmers: the prospects and limitations of fourth generation languages *(French)* 4—9202
PROLOG, applications to AI and natural language programming *(Japanese)* 4—17880
PROLOG, logic programming, query the user facility 4—5709
Prolog, main issues in implementing the programming language 4—5839
Prolog, theoretical bases and current developments *(French)* 4—2436
PROLOG, theoretical principles and current trends 4—13417
PROLOG, use with graphics in the classroom 4—23656
Prolog comparison to Lisp 4—2435
PROLOG for fifth generation computer *(Japanese)* 4—13427
PROSIM language for model construction and simulation *(Dutch)* 4—22496
PROTRAN, implementation of 4—9212
pseudo functional parallel language using intentional logic, semantic specification and proof *(Japanese)* 4—17605
QUASIC for industrial inspection, optical-digital system *(Russian)* 4—5175
query language evaluation 4—9174
query languages for relational databases interpretation 4—22537
RCL with Savvy, general purpose robot control language 4—17817
real time language standards, 80 to 83 4—17843
real time programming, conf. Hatfield, England (March 1983) 4—19115
real-time features available in high-level languages and yet to be implemented 4—13394
recursive dragon designs, Forth appl. 4—13381
recursive structures in Forth 4—13440
relational database theory, book 4—5949
robot language design and analysis, holistic approach 4—22524
robot language for specification of manipulations, RAPT, book contrib. 4—22512
robot languages, current position, book contrib. 4—22511
robot manipulator interactive programming system specification, formal semantic approach 4—22344
robot off-line programming, ROBEX system 4—6582
robot programming language, SRL *(German)* 4—17852
robot programming language MIKAN for teaching-aid robot Armdroid *(Spanish)* 4—7733
robots, controllers and enhanced languages to exploit sensor data 4—7638
rule-based method for system control *(Japanese)* 4—14569
SAS language translation into BASIC 4—22546
scope delimiters effect on program comprehension, expt. study 4—9186
SCRAP, language implementation *(Afrikaans)* 4—17875
SDL, Specification and Description Language, essentials, for computer-controlled communication systems *(German)* 4—12063
SDL as formal description technique of communication protocols 4—12941
search languages in GDR *(German)* 4—18671
selection of language for long-term project 4—9197
semantic description language 4—17898
sensor-based robotic systems, language extension 4—22529
SEQUEL, structured query language, expt. comparison with natural language 4—9171
sequential file processing language 4—13432
ShapeUp logic programming language for DAWN machine architecture 4—13431
shell, V6 UNIX command language 4—17888
signed integer division, Forth-83 standard 4—1665
significant languages for the future 4—17826
SIMBASIC, discrete simulation language for microcomputers 4—17860
SIMBOL—a language for MERA *(Polish)* 4—22497
SIMSCRIPT II programming language on ESER-based computers *(German)* 4—17878
Sinclair ZX81, multi-tasking FORTH ROM 4—17834
SL/1, design of a special-purpose scientific programming language 4—5827
SLAN-4, language for specification and design of large software systems 4—22495
SLOS, specification language for office systems 4—22534
Smalltalk, implemented on VLISP 4—5836

high level languages continued
Smalltalk-80 environment by Xerox Corporation *(French)* 4—17815
Smalltalk-80 for application development 4—9205
software specifications, an interactive approach 4—5714
SOLO user-friendly software environment for the novice programmer 4—17829
SORCA programming language for controlling behavioural experiments 4—13401
specification language for complex logical data processing 4—2434
specification languages FCL and FCD for plant control system, computer aided software design using data/control flow model 4—22370
specification of synchronising process using SYSL specification language 4—13421
Sphere, real-time programming system 4—9303
SQL/N, appl. to attribute relation association 4—9175
standardised Forth words and segregated application packages, identification using reserved prefixes 4—13448
STARS, application-specific task area 4—13233
structural analysis and design by microcomputer 4—6429
structural programming subset for microcomputers 4—13263
Structured Robot Language design 4—5844
SuperForth appl. to multiple mirror telescope servo control system 4—12207
survey of Forth, Pascal, BCPL, LISP, for use on microcomputers 4—9165
symbolic language for nonprogramming computer related tasks borrowed from relay technology 4—5815
symbolic programming advantages, LISP and PROLOG comparison with PASCAL, FORTRAN, Ada *(French)* 4—13414
synchronous parallel algorithms, language considerations 4—5828
system design language for the combination of data flow and control flows graphs 4—17827
systems energy building 4—8988
TECO command strings, macro and programs 4—5820
telecommunications software development 4—2280
test language design for digital LSI 4—22516
TIDAL, IC design language for CAD/CAM 4—10151
time-critical dedicated microprocessing, high-level language architecture 4—5118
Tortoise II graphics language for ZX spectrum 4—3594
TQL, model query language based on domain relational calculus 4—22538
Transputer and Occam: english microcircuit building block for the computers of the future *(Swedish)* 4—16898
Tucson amateur packet radio dynamic addressing protocol, Forth appl. 4—13065
Turtle Graphics language for the VIC-20 and C64 4—5822
type checking of expressions 4—9159
unified-query-by-example information manipulation language based on functional data model 4—22526
unifying multiple semantic intentions for a syntactic construct 4—22480
Unix and C, strengths and weaknesses 4—2523
Unix shell as a command language and a programming language 4—5895
UNIX time sharing system, data acquisition with PDP-11/44 and MBD-11 branch driver 4—14113
user satisfaction survey results 4—14819
verifiable modular programming language 4—2427
VERIFY, Forth programming tool 4—13501
VLSI complexity, control using high-level language for design description 4—23469
voice-input robot control language 4—21187
XR software transportation project on TQ-16 *(Chinese)* 4—5802

high-pass filters
digital, nonrecursive type, Chebyshev weighting, design method using initialisation and search algorithm 4—5155
NEC μPD7720 digital processor—a laboratory-based case study 4—12584
second-order recursive digital filter, design, stability, dynamic range and roundoff noise 4—12554

high power amplifiers *see power amplifiers*

high-pressure techniques
No entries

high-temperature techniques
see also pyrometers
microcomputer-controlled cooled optical pyrometer with 15 sensors for adverse operating conditions 4—1310

high vacuum gauges *see vacuum gauges*

high-voltage engineering
see also high-voltage techniques
analysis and control of transient overvoltages on UHV transmission systems 4—4470
architectural CAD, HVAC system appls. 4—6592
development of digitalized control equipment for the HVDC transmission system 4—20637
HV lines and railroad signal wires, induced voltage in a shared corridor 4—10094
HVAC substation earthing grids, scale model and electrolytic tank tests 4—6469
HVDC control equipment applications of distributed microcomputers 4—20697
HVDC convertor station, SF_6 gas insulated, control and protection system *(Japanese)* 4—16140
HVDC Intertie System support to S California during Pacific AC Intertie tower failures 4—20692
HVDC urban power transmission, symposium, Philadelphia, PA, USA (Oct. 1983) 4—20691
information exchange between control centres in the West European high voltage grid 4—886
man-machine communication—a vital factor in the control equipment for high voltage DC transmissions 4—16103
Ohio State University electric power program, innovative features 4—23332
reliability calculations for capacitor banks 4—6451
Renardieres power laboratory operating system principles and construction *(French)* 4—7823
Renardieres power laboratory VHV equipment operation microprocessor control *(French)* 4—7822
RSX software for HVDC power transmission 4—4463

high-voltage techniques
HVDC link integration methodology for large AC systems 4—4491
HVDC system feed into weak AC system with forced-commutation invertor 4—20693
HVDC terminal design incorporating AC voltage regulation 4—20695

high-voltage techniques continued
HVDC transmission system unconventional operating strategies, controls and filtering techniques 4—20694
HVDC urban system control methods 4—20696
hip joint replacements *see prosthetics*
history
African history, classification 4—13987

AC induction motor drive systems for electric vehicles 4−20603
asynchronous motors, general purpose, power up to 100 kW, CAD *(Bulgarian)* 4−10107
asynchronous motors, transient processes, programmed control, computer-aided anal. *(Bulgarian)* 4−10108
autoadaptive chopper for speed regulation of a wound rotor induction machine 4−20647
bogie drive, parallel connected induction motors fed by invertor, improvement of dynamic behaviour 4−7830
co-ordinate control system, effects of parameter change 4−931
computer-aided steady-state analysis of power-electronic induction-motor drive systems 4−3260
contactor type new 3PK4 controllers for three phase slipring motors 4−859
controlled current electric drive experimental and modelling anal. 4−914
controlled starting of AC induction motors 4−20646
criteria used in evaluating and comparing motors for heavily controlled electric drives of machine tools with numerical control 4−20665
current impressed voltage source inverter fed induction motor control by field orientation 4−7769
current rectifier cascade arrangement for rotational speed control *(German)* 4−7790
current source invertor drives, design, control, 3-phase and 6-phase comparison 4−11721
current source invertor induction motor drive optimal efficiency control 4−921
delta-connected induction motor, three-phase power factor controller design 4−15903
double-cage motor reswitching transients, digital computation 4−3229
drive stabilisation, machine control using stator current feedback 4−11683
dynamic behaviour calculation methods *(Italian)* 4−3232
efficiency relationship with machine and output characteristics, digital computerised control *(Hungarian)* 4−7826
electric drives, speed control system synthesis using digital control theory *(Japanese)* 4−11742
electric drives, thyristor phase-frequency controlled, digital models 4−4502
elevator microprocessor-based AC motor drive control, current-control VVVF induction motor 4−20949
field orientation control method, used for series connected doubly fed machines *(German)* 4−7795
frequency and velocity control, modern design review *(Czech)* 4−7778
generator mode operation in hydroelectric power station, speed control requirements *(Czech)* 4−16120
GTO inverter for adjustable speed AC motor drive system 4−919
hollow nonmagnetic rotor, influence of parameters on rotor resist. *(Bulgarian)* 4−3237
improved method of DC dynamic braking of wound rotor induction motor 4−7811
induction motor drive, invertor-fed, correcting rotor circuit time constant 4−930
inspection system, microcomputer controlled 4−16563
invertor-fed induction motor drive with linear transfer function, theory and characts. 4−922
linear, for robots, parameters optimisation *(Russian)* 4−7684
linear type, tubular, forced oscillations, motor/controller system motion equations formulated 4−11682
linear-type, thermal transients at stochastic load *(Polish)* 4−10115
microprocessor-based induction motor controller for high torque position control 4−23577
multi-motor drive using three phase induction motors and microcomputer control *(German)* 4−7677
non-circulating current cycloconverter systems for speed control of induction motors 4−964
novel rotor-current detection using amorphous-core magnetometer 4−20393
orthogonal voltage regulator for constant stator watts and vars 4−11720
power factor correction, static device, terminal voltage control gives constant phase difference *(Italian)* 4−16164
PWM inverter fed induction motors, microprocessor control, anal. 4−20688
PWM invertor-fed induction motor drive system, closed loop control operation hybrid simulation 4−3259
PWM-invertor-fed, digital speed control 4−923
quick response control, equivalent circuits and theory 4−935
rail transportation, equipment and control systems 4−20935
rolling mill induction motor drive, cycloconvertor fed, microcomputer-controlled 4−936
rotor resist. discrete control, mathematical model and digital simulation *(Polish)* 4−11578
single-phase asynchronous capacitor motors computer-aided design *(Polish)* 4−10116
skewed rotor type, current and flux density saturation in rotor core 4−14314
slip power recovery, transient behaviour in open-loop and with direct current control 4−915
slip ring induction motor, adjustable speed, stability boundary of slip power recovery drive by Liapunov's direct method 4−20649
slip-ring induction motor control by thyristor, digital simulation *(Russian)* 4−18949
slip-ring type, design of computer program for exact computation of pulsation torques *(Czech)* 4−18938
soft-start energy economy and control of induction motors 4−966
software-based speed regulator for induction motor/DC motor electric dives 4−4503
speed, thyristor-diode control circuits 4−11711
speed control of current-link invertor fed machine *(German)* 4−788

induction motors continued
- speed-variable electric drive using three phase regulating unit and asynchronous machine *(German)* 4—7642
- static convertor fed, torque control by magnetic flux control 4—932
- static Scherbius induction motor system optimal speed control 4—7835
- traction drive, microcomputer controlled induction machine, voltage invertor with PWM, dynamic properties *(Czech)* 4—7779
- transistor invertors for induction motor drives, input current harmonics and power factor of operation 4—3263
- transistor-fed AC-servo drive with microprocessor control 4—4500
- variable-speed induction motor drive, microprocessor-controlled three-phase PWM invertor 4—7828
- vector control in induction motor drive *(Japanese)* 4—887
- voltage source invertor induction motor drive, stability anal. 4—3258
- voltage source invertor-fed induction motor, quick response control 4—933

inductors

mobile industrial robot for coal mine, design *(Russian)* 4—20788
Model 705, 7-axis, manufacturing work cell automation 4—7898
modular robot software design and structure 4—4630
modular system, flexible automation 4—20840
modular vision system for inspection, materials handling and assembly 4—1082
modular workhandling systems design 4—20552
MOTOMAN L10W arc welding robot, features and applications *(Japanese)* 4—16323
motorised manipulators dynamics simulation *(French)* 4—20859
mounting of machine subassemblies by robots in machining cells *(German)* 4—1022
MP-9S type twin-arm robot for ETsPU-6030 control system *(Russian)* 4—7930
multi-arm robotic assembly, cost analysis 4—11822
multi-body systems, kinematics modelling tools 4—6601
multi-robot control using production system language 4—20866
multi-robot high level programming system for assembly 4—20843
multiarticulated robots, PanaDac-360 microcomputer control system, assembly appl. *(Japanese)* 4—4588
multiple gripper with six position used to assemble electrical contractors 4—16239
multiple robot systems, local network architectures 4—5483
multirobot high level programming system for assembly 4—4633
multisensor integration and data acquisition system appl. 4—4326
multivariable control, book contrib. 4—20829
NC market in W Europe, survey 4—10611
NC painting system for motor car bodies 4—4604
network analysis 4—21953
nonlinear system, tracking control using sliding surfaces, appl. to robot manipulators 4—11484
numerical controls development *(German)* 4—7967
numerically controlled machine tools, economic and social efficiency of robotic production complexes *(Russian)* 4—20790
off line programming—ZZ *(German)* 4—16280
off-line collision control *(German)* 4—7958
off-line programming, ROBEX system 4—6582

industrial robots continued
open-die forging operations by industrial robot, book contrib. 4—20745
optimal and suboptimal control systems analysis and synthesis *(Czech)* 4—20748
optimising, robot productivity, industrial engineer's role 4—1028
optoelectronic sensors appl. *(German)* 4—11902
order-picking by industrial robot *(German)* 4—16037
oven liner press robotic load/unload system 4—4401
oven liner stamping appl. 4—11813
overhead conveyor and pick and place robots in flexible automation 4—16048
paint robot system interfaced into the manufacturing process, installation guidelines 4—11941
paint shop automation using robots, solns. 4—4637
paint spraying, automation 4—7888
painting, software packages 4—20769
Pana Robo series, design, features and manufacturing system appl. *(Japanese)* 4—4584
Pana-Robo 4000 robot for assembling and arc welding 4—16284
papermill finishing lines, appl. 4—11965
parcel transfer robot control *(German)* 4—4410
Parker Hannifin hydraulic actuators appl. 4—7683
PCBs, loaded, handling system for unattended automatic testing *(German)* 4—11627
performance time analysed *(German)* 4—11857
performance verification, the case for unambiguous standards 4—11811
physical rehabilitation appl. potential 4—434
pick and place robot/manipulation development 4—11609
picture recognition *(Dutch)* 4—14667
planning and simulation in robotics and automation 4—20863
plastics industry, optimal use of robots *(German)* 4—4660
plastics injection moulding, survival via robot unloading devices 4—4408
pneumatic drive cylinder in automatic manipulator motion controlling *(Russian)* 4—20702
pneumatic elements of the system INTEPNEDYN used for industrial automation *(German)* 4—16308
Porsche cars, automated warehouse 4—1016
positioning systems for welding 4—7969
power transmission lines, remote-controlled maintenance device for live line working, feasibility study 4—11746
PPI-II programmable high-speed image processor, flexible real-time eye for industrial robots 4—20730
pricing, assembly and appls. 4—14806
printed circuit motor armature assembling and testing 4—20841
process plant automation, discrete items handling appl. 4—16041
production and intelligent robotics, conf., Besancon, France (Nov. 1983) 4—20848
production processes ensured by loading robots with minimal human supervision *(German)* 4—11837
programmable controllers appl. 4—11808
programmable electronic systems assessment, robotics safety 4—722
programmable two axes robots for automation *(French)* 4—20855
programmed control, ASEA system applications, component recognition and work orientation *(German)* 4—20804
programming language, SRL, for robots *(German)* 4—17852
PUMA robot for assembly of thyristors, visual feedback appl. 4—20856
quality improvement prediction for manufacturing appl., economic justification of robots 4—19479
RCL with Savvy, general purpose robot control language 4—17817
Rediffusion robot business investments 4—14805
relational control mechanism for flexible assembly 4—4621
relay assembly by industrial robot *(German)* 4—11840
remote manipulation tools for disabled user access, command control strategies 4—1084
repeatability determination, automatic measurement of geometrical values 4—4542
research in SERC/industry national programme 4—3648
research scene today 4—16268
retrofit application of loading robot to NC lathe *(Japanese)* 4—16258
robot control M system sensor signals processing 4—1050
robot with precision positioning repeatability, development 4—4541
robot/plasma-arc interface for cleaning gray iron castings 4—4646
robotics successful applications in food industry *(Japanese)* 4—16391
robotisation of management, possible limits *(Dutch)* 4—11845
Robotronic 500, flexible and integratable robot control system *(German)* 4—20761
rodless pneumatic cylinders in robot appls. 4—7945
role in equilibrium economy 4—19481
safety aspects 4—10604
safety measures within legal framework 4—3645
SCARA robot dimensional calibration by teaching *(Japanese)* 4—11866
SCEMI six axis flexible system with computerised control *(French)* 4—16336
seam detectors for arc welding robots *(French)* 4—20853
seam tracking robots, welding appl. 4—7912
second generation, vision systems, book contrib. 4—20828
selection criteria 4—1060
selection procedure for assembly appl. *(German)* 4—11855
selective compliance assembly robot arm controller hardware and software *(Japanese)* 4—7916
self-tuning adaptive control of manipulators 4—4624
sensor guided assembly, robotics research programme 4—4651
sensor information preprocessing system for manipulators based on distributed microcomputers 4—4632
sensors, tactile and strain gauge 4—7660
sensors and AML appl. 4—20885
servo-control of manipulators using model parameter estimation 4—4623
shipyard arc welding robot requirements 4—7972
simulation of operation, accuracy and reliability 4—4626
simulation software for robotic work cell design and construction 4—4559
small part assembly systems using pick and place robots 4—11940
small-scale, types and implementation *(Japanese)* 4—16320
social aspects, w.r.t. political background *(Czech)* 4—14801
socioeconomic efficiency assessment *(Russian)* 4—10613
soft grasping mechanisms *(Japanese)* 4—16319
software design 4—19095
software for solving the inverse kinematic problem for robot manipulators in real time 4—6603
software package for micro-robot and co-ordination between robots with voice command 4—20874

industrial robots continued
specific process systems, development and production at VEB Kombinat Luft- und Kaltetechnik *(German)* 4—11867
specifications, data table, for load capacities 10 to 20 kg 4—16285
spot welding systems, flexibility of individually programmable modules 4—16348
spray painting robots, computer-controlled, technical features and applications *(Japanese)* 4—16321
spray painting robots, hydroservo-controlled, technical features and applications *(Japanese)* 4—16322
spray robot, automatic programming 4—20842
standards development review 4—10603
step motor drive, for assembly and printed board drilling *(German)* 4—7903
structured multiprocessor system for adaptive sensor-controlled assembly robots 4—11918
Structured Robot Language design 4—5844
surface treatment using flexible manufacturing systems and robots *(French)* 4—4592
survey of general purpose industrial robots 4—20801
synthetic speech *(French)* 4—11887
tactile sensing method for programming a robot for surface following 4—4648
tactile sensor for industrial robot *(French)* 4—20500
tactile sensor with decentralised signal conditioning 4—770
Taiwan, development of robots for assembly and machine automation 4—14804
tape motor drive armature assembly and testing robot (IBM 7565) 4—7891
tar content in cigarettes, measurement using a robot to weigh filters 4—16395
teach pendant robot, P5, struct., tasks and programming method *(Spanish)* 4—20799
teaching in INSA of Lyon *(French)* 4—19465
teaching-aid robot Armdroid, programming language MIKAN *(Spanish)* 4—7733
techno-commercial conditions for robot applications in engineering *(Russian)* 4—20792
technology, book 4—20827
technology and development in Japan, reasons *(German)* 4—16196
third generation, image recognition anal. *(Dutch)* 4—12224
threaded fasteners assembly using robots *(Russian)* 4—7931
torque controlled robot arms, CAD of nonlinear controllers 4—11865
Toshiba assembly robot technology, marketing by Evershed Robotics 4—4544
Toyoda Machine Works, robot assembly machines 4—11828
training for new technology, strategy of Ford Motor Company at Dagenham 4—3640
training program for robot operators 4—10
trajectory calculations in the joint space of robots 4—4627
transmission cases cleaning using high pressure robotic waterspray system 4—16241
tube machining, robot technology in chemical plant construction *(German)* 4—1025
turbine blade image processing/robot vision system 4—4405
ultrasonic measuring tests, HSD 06 robot appl. *(German)* 4—1035
Unimation PUMA robot, interactive computer graphics simulator of VAL programming language 4—14585
utilisation with CNC turning machines *(German)* 4—11838
V-1000 Control Automation computer vision system, production environment, robotic visual assists 4—20729
VAL II robot control system, standard interface capabilities 4—20884
value-added system integration playing key role in driving robot market 4—1042
van interior painting, robot system 4—20770
VEB Zentraler Ingenieurbetrieb der Metallurgie, industrial robots *(German)* 4—16275
vehicle body shell production, production automation *(German)* 4—20767
vision, 3D system *(German)* 4—16961
vision, distributed system for symbolic computation 4—5843
vision, spatially parallel architectures appl. 4—7978
vision and contactless measurement systems *(Swedish)* 4—11903
vision assisted robots, advantages 4—20771
vision by optimal contour sensor with associative memory 4—11891
vision development system 20/20 VDS 4—19087
vision sensing for arc welding robots 4—1037
vision system, automobile industry appl. 4—20768
vision system, meas./inspection appl. 4—1068
vision system, three-dimensional imaging, book contrib. 4—21671
vision system integrates to identify components, in assembly process 4—16290
vision system matching algorithm 4—7977
vision systems, for use with ASEA robots 4—16236
vision systems, real-time, using fast hardware and image-processing techniques 4—10284
vision systems for automated production *(Russian)* 4—16297
visual edge tracking, control algorithms 4—4631
visual sensor M3, multifunctional system for application to automation devices *(Japanese)* 4—20487
voice programming system, test results *(Swedish)* 4—16266
welding, safety criteria 4—11938
welding, seam tracking research at Oxford University and General Electric 4—7910
welding, transformer and weld gun 4—20772
welding line with tray-type conveyor *(German)* 4—4573
welding robot on seam in space, control modes *(French)* 4—20854
welding station, programmable, combining robot with 4-axis manipulator 4—7889
welding system, multipass, using robot with sensory feedback 4—4639
welding system appl. 4—20784
western industries, factors affecting introduction of robots 4—3639
Winchester disc drive assembly and testing 4—4560
workpiece loading for turning machine DS2-NC *(German)* 4—16035
yarn reel handling by robot in textile industry *(German)* 4—16367
YESMAN cooperative assembly robot 4—4642
yoghurt pallets handling by centrally controlled computerised system in refrigerated warehouse *(German)* 4—16017
Zehntel, PCB manufacture and testing system 4—11826

industrial standards *see standards*
industries
this heading is restricted to those industries which are not covered by other specific headings
see also automobile industry; brewing industry; brick industry; cement industry; ceramic industry; chemical industry; construction industry; electricity supply industry; food processing industry; glass industry; manufacturing industries; metallurgical industries; mineral processing industry; paper industry; petroleum industry; plastics industry; printing industry; rubber industry; textile industry
beverage bottling plant, CAD appl., path from systems analysis to industrial exploitation *(German)* 4−10451
electronics industry, licensing information system 4−6311
electrostatic precipitation devices for diesel particulate emissions control *(Korean)* 4−16027
Hong Kong industry, OR techniques 4−7426
image processing appl. 4−14280
Japanese government industrial policy for a healthy world economy 4−11214
software package for industry, selection guidelines 4−19764
tobacco leaves optical scanning 4−8005
Turkish industrial firms, survey of computer usage and operations research techniques appl. 4−7404
inertial navigation
aircraft navigation algorithm using measurement-based extrapolation 4−12024
DINS, ring laser gyro system, lessons learned and successes achieved 4−4737
Kalman filter formulations for transfer alignment of strapdown inertial units 4−4713
strapdown formulation, adaptation for processing inertial platform data 4−20962
strapdown inertial attitude reference system computer simulation Kalman filter appl. 4−16475
terminal area navigation with sensors of moderate accuracy, Kalman filter algorithm 4−8033
inertial systems
extremal control algorithm, horizontal drift in nonlinear static characteristics *(Russian)* 4−7521
geodetic height and difference meas. automation *(German)* 4−16590
Kalman filter formulations for transfer alignment of strapdown inertial units 4−4713
multivariable PI-controllers for systems with inertial components, modal design *(Russian)* 4−4237
nonlinear, identification *(Russian)* 4−683
Space Shuttle Orbiter stellar-inertial reference system 4−16447
state estimation and multivariable control, industrial appl., conf., London, England (Jan. 1984) 4−16208
strapdown inertial attitude reference system computer simulation Kalman filter appl. 4−16475
infinite impulse response filters *see digital filters*
infinite series *see series (mathematics)*
information analysis

- EEPROM, double poly-Si n-channel technology, characts. and reliability *(German)* 4−21713
- EEPROM, MNOS 16K device, n-channel Si-gate technology, elec. characts, and appl. 4−1817
- EEPROM, n-channel Si-gate SNOS technology, design and features 4−1813
- EEPROM cells, functioning and potential use in analogue mode *(German)* 4−17048
- EEPROM in microcomputer systems, latched device operation, program features and interfacing *(German)* 4−12652
- EEPROMs, Intel devices, technology, features and appl. 4−1816
- EEPROMs and nonvolatile RAMs for reprogrammable and self-adaptive systems 4−1766
- EPROM, 128K-bit, high speed *(Japanese)* 4−21725
- EPROM, how to use 4−1752
- EPROM, Intel device, intelligent programming module *(German)* 4−8554
- EPROM, p- and n-channel devices, life tests and failure analysis, reliability study 4−1797
- EPROM, UV-erasable 16K, 32K and 64K memories, data retention reliability 4−17034
- EPROM's and programming equipment *(Italian)* 4−1777
- EPROm data loss mechanisms 4−5253
- EPROM emulation using HM6116 static RAM 4−21705
- EPROM from National Semiconductor P^2 CMOS *(Italian)* 4−1778
- EPROM programmer and emulator *(German)* 4−12644
- EPROM programmer for BBC micro 4−1754
- EPROM simulator using Hitachi 6116 static-memory chip 4−21702
- EPROM tester for verifying data and addresses 4−1760
- EPROMs, two replacing 30 for storing programs 4−1768
- error location mapping of memory arrays, syndromes 4−8569
- failure rate model for memory devices 4−21746
- fast large RAM using data traffic managing memory and slow RAM chips 4−21751
- fault tolerance, fault realignment through grouping of compatible faulty memory chips 4−8571
- fault-tolerant design technique for memory system 4−21720
- fault-tolerant memories, distributed permutation logic 4−8572
- FCAT-II: 50 ns/15-V alterable nonvolatile memory device 4−12676
- FET buffer circuit, design for AC write operation 4−1789
- FIFO buffer memory comprising RAM and two pointers 4−1786
- FIFO function and application *(German)* 4−5237
- FIPOS/CMOS 16K-bit static RAM *(Japanese)* 4−21731
- full-wafer memory LSI, defect-tolerant design 4−21737
- gate array failures analysis, using functional ATE 4−21530
- general-purpose memory chip for architecture organisation in computers 4−12678
- hierarchical memory chip, sequential access using integrated three-stage binary counter 4−1788
- high-performance VLSI memory system 4−1781

integrated memory circuits continued
- high-speed RAM testing, gated register pattern generator 4−8564
- I^2L memory, input current compensation technique for restore circuits 4−1792
- I^2L RAM, 256 bit, HV analog circuit, design and characts. *(Japanese)* 4−8578
- I/O terminal arrangement for testing four chips simultaneously at wafer level 4−1793
- injection-coupled logic leads bipolar RAMs to VLSI 4−21707
- Japanese military memory IC sales 4−5234
- Josephson cache memory, design of resistor-coupled logic decoder 4−12414
- Josephson memory cells, single flux quantum type, inductance and threshold characts. 4−21756
- laser-programmed redundancy in RAMs 4−1810
- late address path, buffer integration on memory chip 4−12688
- learning control systems using semicond. memory chips 4−17017
- MC 6809 microcomputer, used with IEEE-488 Talker/Listener bus, DMAC, GPIA *(Italian)* 4−16826
- memory units with programmable arithmetic logic on each memory step *(Japanese)* 4−16927
- merged charge high density memory array, struct. and high speed operation 4−1787
- merged nonvolatile random-access memory cell 4−1794
- MK4501 FIFO dual port memory chip, for connecting asynchronous processors 4−17261
- MNOS byte erasable 5 V-only 64Kbit EEPROM *(Japanese)* 4−21732
- MNOS EAROM, 16Kbit, radiation hardened, design, fabrication, characterisation and testing 4−21716
- MNOS EAROM ER3400, flash X-ray testing 4−21719
- MOS, ROM and RAM technology *(Dutch)* 4−5250
- MOS dRAM, megabit level, depletion trench capacitor technology 4−12691
- MOS dynamic RAM, scaled down, effect of subthreshold current 4−5245
- MOS dynamic RAM, soft error characts., accelerated testing, influence of circuit design *(Japanese)* 4−1805
- MOS dynamic RAMs, 16K 4116 type, plastic packages, reliability evaluation 4−1826
- MOS floating-gate memory elements with drain forward bias, charge accumulation 4−17039
- Mostek MK48Z02 nonvolatile 16 Kbit CMOS RAM *(German)* 4−5239
- MTL storage arrays, restore operation, pulse base circuit 4−12689
- multiple-ROM systems, techniques for reducing revision costs 4−1775
- NMOS dynamic RAM, 256K, 2-μm design rule, high-speed low-power design *(Japanese)* 4−21728
- NMOS EPROM with electron-beam programmable floating-gate FETs 4−12642
- NMOS static RAM, 16K, high speed, TMM2018D 4−12696
- non-volatile memories parallel testing 4−21735
- non-volatile memory devices, programming voltage reduction 4−12679
- novel NMOS E^2PROM scheme 4−12674
- NOVRAM, nonvolatile RAM IC, characts. 4−8559
- on-chip redundancy, implementation using laser fusing technique 4−1811
- onchip error correction in Fairchild 74F418 ECL RAM 4−1756
- product review of RAMs, ROMS, and PROMS 4−1798
- PROMs, replacing hardwired logic *(German)* 4−21708
- radiation response of UV erasable PROM, 64Kbit and 128Kbit 4−21718
- radiation-hardened nonvolatile MNOS RAM 4−21717
- RAM, dual port static, circuit 4−17027
- RAM, protection circuit for power interruption, signal line transients removal 4−5247
- RAM, static, byte-wide, address-transition detection 4−8551
- RAM, testing redundant memories 4−1812
- RAM bit fail maps, pattern recognition 4−21734
- RAM bit line transfer efficiency measurements at in-line testing 4−8566
- RAM dynamic type, metal bitline failure detection using microprobe capacitance meas. technique 4−1791
- RAM MHB 4116 unipolar dynamic memory, for Tesla 270/300 computers *(Czech)* 4−12692
- RAM power supply isolator, back-up battery circuit switching technique using power MOSFET 4−8362
- Ram test using machine code program *(German)* 4−17021
- RAMs, innovations in MOS technology 4−1761
- repair using laser beam machining *(French)* 4−12142
- reprogrammable EEPROM with super-ionic conductor/semiconductor sandwich structure 4−5246
- ROMs and RAMs, review *(French)* 4−5241
- semiconductor RAMs, process refinements 4−1773
- sense system, leakage-tolerant, circuit design 4−1790
- shared-memory multimicrocomputer system design 4−21785
- Signetic's E-PROMs, unique on-chip test structures 4−1757
- single event upset rate, dose depend. in MOS DRAM 4−21723
- single-event upset modelling for bipolar RAM 4−21724
- single-event upsets and latch-up in CMOS memories 4−21721
- SONOS/CMOS non-volatile RAM 4−21744
- spacecraft RAM, proton-induced single event upset rates in orbit 4−21722
- static column RAM almost doubles data rates 4−21710
- static RAM arrays, precharge cct. 4−17035
- static RAM new redundancy circuit utilizing laser-diffusion programmable devices *(Japanese)* 4−21729
- static ROM, NMOS, 256K device expandable to 512K, design and characts. 4−21714
- SY2130 8K-bit dual-port static RAM for designing multiprocessor systems 4−1774
- TCS146 4K memory, transient and total dose radiation props. 4−21381
- Tektronix nonvolatile data memories, selection criteria *(German)* 4−17036
- Toshiba's TC5564/5P low-power 64K CMOS static RAMs 4−5249
- true-complement generator, circuit design for faster-going positive output 4−12687
- UKP-1 device for functional testing of semiconductor memories *(Russian)* 4−17038
- VC 20, super storage using iRAM *(German)* 4−12755
- video RAM for fast graphics, TI TMS4161 4−1762
- VLSI, 256Kbit DRAM and 64Kbit static RAM *(Japanese)* 4−12690
- VLSI dynamic RAM cell defect localization and anal., laser cct. isolation 4−1825
- VLSI memories, M118-M laser trim equipment, computer controlled system for test/repair 4−1044
- VLSI memory management chip for BELLMAC-32 microprocessor 4−21741

integrated memory circuits continued
Z800 microprocessors family, on-chip cache memory 4—1498
GaAS SRAM, subnanosec. 8-bit normally-off 4—21740
GaAs 1K static RAM using WSi$_2$ gate self-aligned technology 4—12666
Si MESFET ICs, transient radiation effects 4—21715
TA11256 8K ROM, transient and total dose radiation props. 4—21381

integrated optics

  CMOS inverter simulation in NAP2 program, transfer input-output characts. 4−14376
  commutatorless motor, constant margin-angle control of load commutated invertor, stability analysis 4−11719
  control for automation of high-energy parameter processes *(German)* 4−7692
invertors continued
  control methods of voltage and current invertors using microcomputers and programmable memories *(German)* 4−7691
  current frequency converter for chemical industry multimotor application *(Czech)* 4−23309
  current impressed voltage source inverter fed induction motor control by field orientation 4−7769
  current source invertor induction motor drive optimal efficiency control 4−921
  current source systems, DC, single and three phase AC, link inductance reduction 4−11718
  DDC AC machine-tool spindle invertors, trends *(Japanese)* 4−706
  direct digital controlled PWM GTO inverter for DC 1500 V electric cars 4−7831
  dual bridge invertor, transformer-coupled voltage control scheme 4−881
  Freqrol versatile invertors for motor speed control *(Japanese)* 4−707
  frequency and PWM control system using IC components *(Polish)* 4−20656
  frequency changes ccts., using microprocessor based invertor controllers, thyristors *(Spanish)* 4−10291
  German State Railways, invertors and signalling *(German)* 4−12113
  GTO inverter for adjustable speed AC motor drive system 4−919
  GTO invertor control system, for AC drive transit car 4−7832
  HF three phase static converter for open-cast mines *(Russian)* 4−4479
  HF voltage-clamped power invertors, resonant reactor-energy conditioning loops and control 4−949
  high frequency inverter using power MOSFET, characts. 4−3325
  HVDC system feed into weak AC system with forced-commutation invertor 4−20693
  HVDC urban power transmission, symposium, Philadelphia, PA, USA (Oct. 1983) 4−20691
  induction machine, current source invertor-fed, behaviour anal. 4−18956
  induction motor controlled current electric drive experimental and modelling anal. 4−914
  induction motor drive, invertor-fed, correcting rotor circuit time constant 4−930
  induction motor drive with linear transfer function, theory and characts. 4−922
  induction motor drives, design, control, 3-phase and 6-phase comparison 4−11721
  induction motor speed control, used for current link invertor fed machine *(German)* 4−788
  induction motors, PWM-invertor-fed, digital speed control 4−923
  invertor-fed AC motor speed control and invertor waveform harmonic analysis by microprocessor 4−7827
  invertor-fed synchronous motor theory and computer simulation 4−10118
  line current harmonic's compensation scheme for power distribution system *(French)* 4−10097
  load-independent commutated voltage source inverter for induction heating 4−11588
  microprocessor controlled frequency convertors, design and operation *(Spanish)* 4−4475
  microprocessor-based controller for pulse width modulated inverters, appl. in traction *(Hungarian)* 4−16116
  MOSFET static power invertor, config. and design using computer programs, household photovoltaic appl. *(Spanish)* 4−14358
  motor-speed control apparatus, computer simulator *(Japanese)* 4−3415
  multi-element induction cooker invertor and control methods 4−942
  parallel type, auxiliary thyristor bridge circuit, computer simulation, starting conditions analysis *(Rumanian)* 4−10110
  power conditioning systems in the EC photovoltaic pilot plants 4−7770
  power electronics 83, conf., Tokyo, Japan (March 1983) 4−3224
  power system stabilization, HVDC link control capability exploitation 4−912
  power transistor PWM type VVVF invertor, for variable speed motor control 4−7797
  PWM, with instantaneous feedback, control strategy analysis and verification by simulation 4−916
  PWM inverter fed induction motors, microprocessor control, anal. 4−20688
  PWM invertor control using a multimode modulator *(French)* 4−20700
  PWM invertor-fed induction motor drive system, closed loop control operation hybrid simulation 4−3259
  PWM thyristor invertor, 3-phase, having capacitive load, circuit and by computer 4−3262
  rail transportation, equipment and control systems 4−20935
  SIPMOS transistor control circuits with transformer connection, operation and appl. *(German)* 4−20630
  slip-ring induction motor control by thyristor, digital simulation *(Russian)* 4−18949
  three phase inverter controlled by microcomputer based firing circuit 4−14562
  thyristor control using microcomputers *(German)* 4−867
  thyristor frequency converter for frequency control of an electric motor *(Russian)* 4−20670
  traction drive, microcomputer controlled induction machine, voltage invertor with PWM, dynamic properties *(Czech)* 4−7779
  transistor invertors for induction motor drives, input current harmonics and power factor of operation 4−3263
  urban transit vehicle, 30 kVA transistor invertor auxiliary power supply, closed loop voltage regulation 4−12007
  variable motor-speed control, general purpose DDC system *(Japanese)* 4−3414
  variable-speed induction motor drive, microprocessor-controlled three-phase PWM invertor 4−7828
  variable-voltage variable-frequency (VVVF) invertor for air conditioning *(Japanese)* 4−11739
  variable-voltage variable-frequency systems for mill auxiliary lines *(Japanese)* 4−704
  voltage source invertor-fed induction motor, quick response control 4−933
  zero current modulated single phase voltage source inverter with an induction heating tank load 4−941

symbolic IC design, formal semantics 4−21532
System 720, VLSI board tester, and System 730, an incircuit tester 4−18991
systolic array chip designs 4−21479
systolic array for recursive least-squares minimization 4−21480
systolic arrays, conf., London, England (Feb. 1984) 4−21476
systolic arrays design for VLSI implementation 4−21477
systolic arrays for adaptive antenna array signal processing 4−21481
systolic design for connectivity problems, VLSI implementation 4−19896
systolic multiplier for finite fields GF(2^m) 4−21421
teaching the architectural design of VLSI systems 4−23500
technology analysis, effect on bandwidth costs 4−22258
technology and design aids 4−19027
terminal controller chip, NS455 4−22189
ternary logic and circuit design using ternary multiplexers 4−16720
test software development for LSI testing with Megatest MegaOne 4−10132
test system for VLSI, MegaOne 4−8114
Thompson's model, where-oblivious is not sufficient 4−16763
three-dimensional VLSI circuit layouts, automatic generation 4−23479
token ring local area network requirements, system silicon 4−13015
trade-off between area and crossing number in graph embedding *(Japanese)* 4−3315
transputer chips in CMOS LSI, basic concept and architecture 4−12441
two-dimensional analysis of semiconductor devices using general-purpose interactive PDE software 4−14386
universal asynchronous and synchronous VLSI simulator 4−23502
unsorted dictionary machine for VLSI 4−17723
variable length shift register, LSI-MOS implementation 4−12411
variable precision processor module, floating-point operations, VLSI implementation 4−21474
variable-size-FFT computations, VLSI network 4−12350
VASTOR array processor, 1-bit processing element, VLSI implementation 4−16851
VLSI, 256Kbit DRAM and 64Kbit static RAM *(Japanese)* 4−12690
VLSI, automatic variable-width routing 4−14402
VLSI, BICEPS two-dimensional process simulation program 4−14431
VLSI, CAD using LISP programming 4−10187
VLSI, combining symbolic design tools with switch level simulation 4−19039
VLSI, computational aspects 4−12501
VLSI, conference, Waterloo, Ontario, Canada (Oct. 1983) 4−19030
VLSI, digital, DC test, system architecture for optimum DC parameter measurements 4−21588
VLSI, industry implications 4−16790
VLSI, single-layer routing, anal. and algorithms 4−14399
VLSI, SUPRA two-dimens. process simulation 4−3360
VLSI, test set reduction using the subscripted D-Algorithm 4−23438
VLSI, testability anal. algorithm 4−19037
VLSI and microcomputers, conf., Hong Kong (Dec. 1982) 4−5386
VLSI architecture for a virtual instrumentation based laboratory waveform generator 4−23506
VLSI architecture for adaptive digital filtering utilising the number theoretic transform 4−8483
VLSI architectures for digital switches 4−16491
VLSI architectures for feature extraction and pattern classification 4−16905
VLSI area-time complexity of sorting 4−21341
VLSI array design under constraint of limited I/O bandwidth 4−21514
VLSI array designs, unification with geometric transformations 4−8454
VLSI artwork analysis, space efficient algorithms 4−3353
VLSI artwork verification, data structure and algorithm 4−23464
VLSI ATE systems, design, new developments 4−21106
VLSI automatic micropattern measuring, device testing and data analysing system *(Japanese)* 4−21092
VLSI based systems, memory functions 4−21748
VLSI binary integer multipliers, optimal time, recursive implementation 4−8367

large scale integration continued

programmable test point, used for logic cards containing buried oscillators 4−12486
PROM family designed to aid testing 4−1799
pseudorandom sequence generators for test signals 4−16870
pulsers for logic testing, GSC kit 4−1565
real-time statistical analysis of software operation, development systems and logic analysers *(French)* 4−13496
redundancy and don't cares in logic synthesis 4−5090
register arithmetic logic unit testing, recurrent test patterns 4−21524
register transfer level design verification, inductive assertion method 4−21511
self-checking system design 4−5093
self-checking technique for logic circuits *(Chinese)* 4−5083
self-test checkpoint hardware 4−1579
sequential circuits, testing using gate-level ATPG, theoretical limit considerations 4−21527
sequential logic devices, pseudorandom testing, test coverage model 4−1576
serial shadow register diagnostics for system self-testing 4−8403
shift-register latch, self-test implementation 4−1480
signature anal., basics and meas. practice *(German)* 4−1568
signature analysers for μP system diagnosis 4−16876
signature analysis as methodology of fault-finding in microprocessors 4−21564
signature analysis based test philosophy 4−8118
signature analysis for failed field replaceable unit identification 4−1580
signature testing of sequential machines 4−21417
SQUID type Josephson logic gate, parameters meas. using on-chip technique, design appl. 4−21401
STAMP, system testability and maintenance program 4−10198
state analyser, CRT screen *(Spanish)* 4−8391
syndrome testable design of combinational networks for detecting stuck-at and bridging faults 4−21415
system-level logic analysis for enhanced design capabilities 4−1572
teaching courses in elec. engineering-computer science curriculum 4−19534
test bar for TI TAT008 gate arrays 4−8380
test sequences generator for probability systems of digital devices diagnostics *(Russian)* 4−1575
testability conditions for bilateral arrays of combinational cells 4−21318

logic testing continued
testability design rules, CAD extension to test pattern generation *(German)* 4—14293
tester for logic states *(Polish)* 4—21519
tester using LEDs, short pulse detect. *(Spanish)* 4—8388
Tetronix 1240 fourth generation logic analyser *(German)* 4—1590
timing and state anal. with μAnalyst personal instrument 4—8404
timing fault location in synchronous sequential IC 4—21529
transitional timing analysers for systems with long dead-times 4—1602
universal tests for detection of input/output stuck-at and bridging faults 4—21515
VLSI, testability anal. algorithm 4—19037
VLSI carry-lookahead adders, on-chip test pattern/result vector generation 4—8396
VLSI chip tester with two high-level languages 4—18990
VLSI combinatorial and sequential circuits, universal test for fault detection and identification 4—12481
VLSI digital correlator, architecture design with built-in self-test/repair feature 4—21672
VLSI logic, signature testing, diagnostic capabilities 4—8386
VLSI logic ccts. testing using linear codes 4—8398
VLSI test program generation: a system for intelligent assistance 4—23447
Z80, logic anal. *(German)* 4—1571
Z-modulation and Internal Clock options, used for logic analyser 4—1587
Zycad logic evaluator 4—21842

logistics data processing
see also computerised materials handling
integrated logistic support strategy 4—2860
tactical situation assessment, hypothesis, program and database struct. for decision making process 4—6134

long tailed pair *see differential amplifiers*

loop antennas
No entries

Loschmidt number *see constants*

loss measurement
No entries

losses
see also eddy current losses; heat losses; magnetic leakage
distribution loss analysis for Salt River Project, Arizona, USA 4—14366
distribution networks, analysis and data processing programs *(Russian)* 4—14329
economic selection of submersible pump cables with a programmable calculator 4—14374
evaluation of economy and/or security oriented objective functions for reactive power scheduling in large scale systems 4—7804
iterative algorithm for power distribution points *(Russian)* 4—14331
power loss evaluation for Salt River Project, Tempe, Arizona 4—18964
power transmission lines, power and load loss calculations, line capacitance effects *(German)* 4—18932

loudness
see also acoustic intensity measurement
neural model of binocular brightness and binaural loudness perception, nonlinear sensory input summation 4—15714

loudspeakers
JBL's central array design program 4—10127
physical behaviour, mathematical analysis *(Dutch)* 4—14383
siren, piezoelectric US, using 80C86 CMOS microprocessor 4—16824

low gravity experiments *see zero gravity experiments*

low-pass filters
2-D wave digital, circularly symmetric design 4—16944
active, calcs. using TI-59 calculator, program 4—19001
bandpass matching networks maximizing available transformation 4—14453
canonic-signed-digit code digital filters, design and optimization, PCM lowpass 4—1671
circularly-symmetric two-dimensional low-pass digital filters, design, modified McClelland transformation *(Japanese)* 4—12558
digital, for data filtration and reduction *(Polish)* 4—5158
digital, nonrecursive type, Chebyshev weighting, design method using initialisation and search algorithm 4—5155
digital filters, CAD using interactive optimisation techniques 4—12555
digital filters, maximally flat rational approximants in multidimensional filter design 4—1672
elliptic filter design using TI-59 calculator 4—19002
FIR digital filter, low pass, programmable, 14-span, bit-sliced design 4—1683
second-order recursive digital filter, design, stability, dynamic range and roundoff noise 4—12554
stable 2-D recursive filters, design by generation of VSHP using terminated n-port gyrator networks 4—1682

low-temperature physics *see cryogenics*

low-temperature production
see also refrigeration
counterflow heat exchanger for superconductor cooling systems *(Japanese)* 4—19242

low-temperature techniques
see also cryostats; refrigeration
overflow sensor, for liquid N_2 filling system 4—1321
spectrometer for 0.8 to 45, range, using Elektronika 100I computer 4—16569

LPE *see liquid phase epitaxial growth*

LSI *see large scale integration*

luminescence chambers *see scintillation chambers*

luminescent devices
see also fluorescent screens; scintillation counters
electroluminescent flat-panel display, personal computers appl. 4—8881
electroluminescent interactive display terminal, hardware/software design aspects, military appl. 4—5590

lumped parameter networks
ladder networks, general purpose analysis program for HP-41 calculator 4—3271
LC ladder networks, open circuited and short circuited, computer synthesis 4—14460
lumped parameter systems, linear and nonliner detection and stability rules *(Russian)* 4—7185

lumped parameter networks continued
prediction of the optimum coupling for PLC propagation on double circuit and high phase order transmission lines 4—23324
RLC, material functions realizable by circuits of limited complexity 4—21494

lunar atmosphere *see Moon*

lung
avian lung modelling, regional ventilation-perfusion inhomogeneity 4—14193
cardiopulmonary parameters estimation using quasi-optimal inputs 4—11289
heart-lung bypass machines, power and weight characts. of thermoregulating devices 4—1324
histological lung sections, inhaled particles spatial distrib. quantification, microcomputer based system 4—14218
nodule evaluation system, design, function and performance evaluation 4—10032

Lyapunov methods
analytical design of nonlinear regulators, Lyapunov function method 4—4209
bilinear control system, discrete, model reduction 4—11489
computational methods in control and system theory *(Korean)* 4—341
differential equations with damped oscillation, stability *(Hungarian)* 4—7509
direct Lyapunov method and the structure of manifolds of motion of dynamic control systems *(Russian)* 4—15781
discrete time distributed parameter systems, optimal feedback control 4—15882
distributed parameter systems, real time parameter identification using Lyapunov design method 4—4274
distributed parameter systems, real time parameter identification using Lyapunov design method 4—4275
distributed system appl. 4—11462
ecology, stability of two-prey, one-predator communities 4—15586
enzyme reaction systems, parameter identification using model reference adaptive techniques *(Japanese)* 4—19969
globally asymptotically stable Lyapunov's functions distribution method *(Chinese)* 4—4204
Hamiltonian-type Lyapunov functions 4—7513
highly nonlinear plants, adaptive control 4—11479
large-scale dynamic systems, stability *(Japanese)* 4—20322
linear and nonlinear systems, stability analysis using decrescent quadratic Lyapunov function 4—11344
linear discrete real-time systems, optimal control synthesis *(Russian)* 4—4250
multimachine power systems, limit time of emergency cutout, stability anal. methods 4—20295
multiplex control systems, stochastic stability and dynamic reliability 4—643
multivariable linear discrete-time model-reference adaptive control, parameter adjustment algorithm *(Japanese)* 4—15844
nonlinear control theory, book 4—4292
nonlinear sampled data systems with dynamical multiplicative perturbations, robustness 4—20978
slip ring induction motor, adjustable speed, stability boundary of slip power recovery drive by Liapunov's direct method 4—20649
stability investigations by indefinite Lyapunov functions *(Hungarian)* 4—7508
stable control system synthesis, mean-square performance criteria 4—15761
transient stability analysis of large scale power system by Lyapunov's direct method 4—20292

lymphocytes *see blood*

lysozyme *see proteins*

M-regions *see Sun*

M-type tubes *see microwave tubes*

machine bearings
integrated magnetic actuator and sensor for use in linear or rotary magnetic bearings 4—11600
magnetic bearings with feedback control *(French)* 4—4507

machine insulation
No entries

machine oriented languages
see also assembly language
6502 machine code, space invaders program 4—3610
abstraction in the Intel iAPX-432 prototype systems implementation language 4—17811
always compatible instruction set architecture (ACISA) 4—22462
arithmetic subroutine package for processing measurement data *(German)* 4—2420
ASEA's new PC system: language for non-computer experts *(Swedish)* 4—23549
axiomatic proof rules for a machine-specific microprogramming language 4—21363
CECIL low-level programming language, Vic-20 implementation 4—22463
cell processor design and instruction set anal. *(Hungarian)* 4—1700
debugging methods 4—9257
Dragon microcomputer, machine code appls. 4—3608
fast data transfer using CBM-40/8032 *(German)* 4—5766
hexadecimal machine code for 8080 and 8085 programs *(German)* 4—13487
instruction set architecture for Abstract Forth Machines 4—13388
instruction set design 4—22467
instruction set for a single-chip 32-bit processor 4—2424
interpretation 6502 machine code 4—2419
LED flashing, program *(German)* 4—6486
M6805 family, programming ease 4—2425
machine code, how to use it on a Dragon 4—9146
MC68HC11 microcomputer chip, instruction set in industrial control appl. 4—8334
MC 68000 microprocessor peripheral chips, hardware, software *(German)* 4—1995
microcode generation with development systems 4—8998
microprocessors instruction sets 4—9148
MIPS, performance issues in VLSI processor design 4—21471
MK68200 16-bit single chip microcomputer, instruction set architecture 4—1519
monitor utility program for development of routines *(French)* 4—17931
PC 1500 machine language *(German)* 4—13384

machine oriented languages continued
PEARL, for programming industrial robots *(German)* 4—20760
PN 5000 language, source program translation using CO 5000 compiler *(German)* 4—13453
program for producing bar charts on CBM computers *(German)* 4—6167
PSL/PSA for old assembly language program reconstruction 4—22333
RISC architectures, high-level function compilation 4—21605
RISC computers, assessment 4—21604
ROBEX programming language and ROBGEO system, industrial robots appl. *(German)* 4—16280
Strukta, language for efficient assembler programming *(German)* 4—13385
teaching aid for 4—2287
TI-99/4A home computer, machine language *(German)* 4—17128
timing in psychological expts., advantages of machine language over BASIC 4—6677
TMS 7000 family, programming and microprogramming 4—2315
Z80 machine language, CPU logic interconnections, AND/OR/EXOR functions *(German)* 4—64
Z80/81 microprocessor machine language instructions *(German)* 4—5795
Z 80 machine language, clear text for Sinclair ZX 81 *(German)* 4—2423
Z 80 machine language, introduction, clear text for ZX 81, program listing in machine language *(German)* 4—13386
Z-80 machine language, appl. to ZX81 clear text *(German)* 4—17810
Z-80 machine language, f-register flags *(German)* 4—19524
Z-80 machine language, relative jumps for address bytes *(German)* 4—5796
Z-80/ZX81 microcomputer machine language, FOR-NEXT loops *(German)* 4—9149
ZX81, machine language aspects *(German)* 4—17809
ZX81, machine-code programming *(French)* 4—2418
ZX81 cleartext, data packet transport *(German)* 4—22465
ZX machine language, assembler and disassembler concepts *(German)* 4—2421
ZX Spectrum machine program introduction *(German)* 4—5053
ZX-81, writing machine code 4—23760

machine protection
12 V motor, PWM control circuit for RPM stabilization *(German)* 4—16130
economical motor protection using microcomputer technology 4—14372
microprocessors in power system protection, modular systems *(German)* 4—16129
optimum inspection policy for a protective device 4—19871
symmetrical-components calculation, microprocessor-based algorithm 4—23341

machine testing
asynchronous machine control, real-time active power and power factor meas. *(German)* 4—7814
computerised repair diagnosis system 4—3254
hydraulic motors, starting and low speed characts. 4—11590
inspection system, microcomputer controlled 4—16563
microcomputer-controlled endurance test stand for electrical machines *(German)* 4—12156
robot system for printed circuit motor armature assembling and testing 4—20841
rotating field motors, microprocessor controlled test rig *(German)* 4—4460
rotating machinery data acquisition and diagnostic information systems, impact of microprocessors 4—6594
structured rotating machinery information system 4—9683
tape motor drive armature assembly and testing robot (IBM 7565) 4—7891
temperature alarm monitor, microprocessor-based design 4—831

machine theory
AC generator transient stability with governor action using phase space method 4—14307
asynchronous motors with hollow nonmagnetic rotor, influence of parameters on rotor resist. *(Bulgarian)* 4—3237
EM field programs, finite element method contrib. 4—23338
invertor-fed synchronous motor theory and computer simulation 4—10118
nonholonomic systems dynamics, research results 4—7173
permanent magnet synchronous motor AC servodrive, rotor-oriented control *(German)* 4—11580

machine tools

optical computing development, ultra-high-speed matrix algebra 4—5204
optical digital rapid unbiased bipolar incoherent calculator (RUBIC) cube processor 4—21667
optical matrix-vector processors, direct and implicit algorithms 4—8216
optimal control and filtering systems, discrete matrix Riccati equation appl. 4—7542
orthogonalisation for power-system computations 4—14308
overdetermined systems of linear inequalities, linear one-sided approximation algorithms 4—15269
parallel Fourier transform system using differential transform matrix 4—12301
partial realisation problems 4—3954
partially separable functions, convex decompositions 4—10868
pattern anal., VLSI arrays with limited I/O bandwidth 4—12521
permanent of matrix, computational complexity 4—21221
perturbation theorems for matrix eigenvalues 4—1378
planar shape data, vertex detection using theory of tangential deflection and curvature of plane discrete curves 4—20049
polynomial equation, solution algorithm 4—19819
polynomials, transformation of single variable to two variable, matrix technique 4—217
portable CAL software, modular design 4—23660
power spectrum of group pulse processes with independent points 4—15182
power supplies, independent, variable operating conditions control and anal. *(Russian)* 4—875
power system operations and planning, use of multiple factoring in the parallel solution of algebraic equations 4—23369
projective power method for the algebraic eigenvalue problem 4—8212
properness of feedback transfer matrices 4—11315
queueing problems, matrix methods 4—11366
queueing theory, matrix-analytic methods appl. 4—10877
rectangular matrix generalised inverse, numerical computation 4—1376
regularization of the problem of using transition matrices for prediction 4—15447
resistant lower rank approximation of matrices 4—12267
resultant matrices, generalized, and minimal bases 4—10871
Riccati equation, algebraic, dual formulation 4—19820
signal processing appls., use of fast algorithms for block Toeplitz matrices with Toeplitz entries 4—19821
singularly perturbed linear discrete time systems, difference approximation 4—7543
small-computer algebra system for engineering analysis 4—10089
sparse matrix solution, algorithm 4—1375
sparse matrix solving package 4—1374
spectral properties of $A^{-1}B$, A and B as square matrices 4—10862
stability analysis, numerical method using Ljapunov's matrix equation *(Croatian)* 4—18944
state space equations analysis via Laguere polynomials 4—11329
static power convertor circuit anal. using state-space methods *(Korean)* 4—23390
static Scherbius induction motor system optimal speed control 4—7835
stochastic bilinear systems, identification problems 4—7577
Strip and Mask method for raising Leslie matrix to powers, population model appl. 4—20251
structure, Smith-MacMillan form and coprime MFDs of rational matrix 4—7495
subinverses of fuzzy matrices 4—19817
suboptimal controller design, aggregation matrix for the reduced-order modified Cauer CFE model 4—20296
time delay systems, analysis via Walsh functions 4—15880
transformations, graphic display manipulation aid 4—17751
transitive fuzzy matrix, canonical form 4—221
transpose multiplication by vector processing 4—23170
tridiagonal matrices, controllability, inertia, and stability 4—10867
tridiagonal matrix, explicit inverse 4—10865
unconstrained optimisation, convergence of variable methods 4—321
unreciprocal electric cct., FORTRAN program for determ. of common normal tree and incidence matrices *(Rumanian)* 4—18973
up- and down-dating procedures for linear L_1 regression 4—15130
updating technique for the solution of a sequence of linear equations 4—21216
use of multiple factoring in the parallel solution of algebraic equations 4—6453
vector computer for sparse matrix operations 4—5140
vertex characterizations of some polyhedra related to row circular matrices 4—15539

- pathways to solutions 4—11209

operations research continued
performance evaluation study performed on a FELIX M18 microcomputer system *(Rumanian)* 4-9410
personnel ranking system, linear Markov model description 4-7480
pipe networks, dynamic analysis, efficiency improvements 4-20256
point estimation and process models, the spline function alternative 4-4089
policy analysis, decision aiding models 4-4095
portfolio analysis, risk and spectral instability 4-7334
potential identification factor-travelling salesman problem, optimal solutions 4-15533
preference convex unanimity in multiple criteria decision making 4-15567
primal simplex based network codes, comparison of pivot selection rules 4-20099
probabilistic analysis of an error-correcting algorithm for the towers of Hanoi Puzzle 4-20106
problem formulation, analysis, and implementation, far reaching effects 4-15554
problem formulation and the consultant-client relationship 4-15552
production line, bufferized, discrete event aggregate dynamical model 4-11251
production line, interstage buffer capacity allocation 4-15650
production line queueing model, associated stochastic processes and their network representations 4-11243
production management, strategic role development 4-544
production management in Britain, Japanese style 4-14967
production planning, aggregate and decomposition method, electronic tube production unit appl. 4-7408
production systems, failure and repair characteristics investigation using Markovian models 4-11228
profits sharing and liabilities of pool of dockers 4-20186
program selection/resource allocation model for control of malaria and related parasitic diseases 4-589
project selection, interactive, note on multiplicative utility 4-7344
project sequencing problem complexity anal. 4-4099
projects success, effect of innovativeness of project and participation of concerned parties 4-20107
public utility location in rural southern Thailand, rural district planning 4-20095
Q-GERT vs. GPSS for operations research 4-2446
rail yard humping, sequencing model 4-4144
railway transportation policy and systems science in Canada 4-562
randomized Byzantine generals 4-22075
rectangular warehouse, order picking problem 4-549
repairable item provisioning, multi-echelon, closed queueing network model 4-15654
representation result for preferences 4-20094
resource allocation in business operation with uncertain worth, decision support system appl. 4-15624
resource allocation with tree constraints 4-11187
resource distribution models, principles and applications *(Russian)* 4-15573
risk analysis, testing some prejudices to studies 4-7332
risk premiums for decision regret 4-7349
risky R&D model, different formulations 4-20100
route-dependent open-shop scheduling 4-11231
rubber product manufacturer, model for forecasting future demand for tyres 4-20185
sales territory alignment for sparse accounts 4-7390
seagoing chemical tankers, stowing problems, decision support system appl. 4-7431
search for moving target, FAB algorithm 4-4098
shelf algorithms for two-dimensional packing problems 4-523
shortest Hamiltonian path in symmetric Euclidean case, upper bound 4-7356
shortest path problem algorithm *(Chinese)* 4-4087
shovel-truck system in open pit mines, microcomputer simulation CAPS 4-10458
single server queue, diffusion model, transient soln. *(Polish)* 4-19839
squashed cube conjecture, proof 4-4091
stable planning by linear and convex models 4-15570
standard times definition using sampling distribution of the mode 4-11175
steel pricing case study 4-20197
surveillance search for moving target 4-4097
survival curves and scrappings *(Hungarian)* 4-15679
Swedish Defence Research Institute, facts, methods, programmes and paradigms 4-7338
systems science, conf., Wroclaw, Poland, Sept. 1981 4-7120
teacher allocation, goal programming approach 4-7449
Texas financial forecasting, time series analysis appl. 4-7379
textile winding process model 4-11242
three person Baccarat 4-11174
three state hierarchical manpower system, mean waiting times to promotion and wastage 4-610
time constrained travelling salesman problem, exact algorithm 4-11188
travelling salesman problem, hierarchy of relaxations 4-4090
travelling salesman problem, route first-cluster second vehicle routing, combinatorial analysis 4-7353
truck travel time in open pit mines, microcomputer simulation program CALCUL 4-10457
Turkish industrial firms, survey of computer usage and operations research techniques appl. 4-7404
two dimensional trim-loss algorithm, modification for dealing with cutting restrictions 4-11179
two lane highways, geometric and environmental effects on speeds 4-4149
two lane highways in Ontario, volume effects on speeds 4-4148
two-product single machine system, determination of economic production quantities 4-15668
two-stage transshipment problem, complements and substitutes among locations 4-11255
uncapacitated plant location problem, facets and lifting theorems 4-15569
uncapacitated plant location problem, valid inequalities and facets 4-15568
United States House of Representatives, apportionment principles 4-7482
urn problem and application 4-11169
US joint venture research and development, policy evaluation 4-7419
vector optimisation from coalition-game theoretical point of view 4-4093

operations research continued
vehicle routing problem, Lagrangean relaxation heuristic appl. 4-11254
weighted Euclidean 1-center problem 4-15566
Welfare economics, 4-15596

operator training *see training*

optical aberrations *see aberrations*

optical beam modulators *see optical modulation*

optical beam splitters *see optical elements*

optical bistability
computer advantages and heating problems 4-5021
nonlinear Fabry-Perot etalon as optical logic gate 4-16797

optical character recognition
see also character recognition equipment
applications and design 4-13070
bar-code data-input system, optoelectronic structure *(German)* 4-13082
camera for inkprint to text translation 4-12118
correlator for recognizing characters printed on paper 4-11102
data entry technology, review 4-8859
decision tree design using probabilistic model 4-15370
DEST Corp.'s WorkLess Station, OCR page reader for word processing 4-8872
distorted character generation for Kanji and Roman characters *(Japanese)* 4-15382
document reading processor-based OCR system 4-20044
electronic mail applications 4-9404
equipment and application 4-5525
Fegerl interfaces and peripherals *(German)* 4-2139
hand scan OCR system with one-dimensional image sensor 4-8873
handprinted Chinese characters recognition by peripheral direction contributivity feature *(Japanese)* 4-15378
handprinted Kanji characters by rectangular segment matching *(Japanese)* 4-15379
handprinted Kanji recognition by feature matching methods, appl. to personal OCR 4-4045
handwriting, optical character recognition 4-11060
IBM 3886 equipment substitution, universal program for magnetic tape data processing *(Czech)* 4-5884
image thresholding for OCR and other appls. 4-20045
kanji-reading OCR high-speed data-entry device 4-13087
multifont printed Chinese, simulation system design *(Japanese)* 4-446
networks for improved data entry and multifunction capability 4-8864
OCR scanners, productivity increase 4-17438
office automation systems integration 4-2140
Opt Vision VS-6502A pattern recognition system, inspection and OCR appl. *(Japanese)* 4-5181
optical mark readers, off-line and on-line 4-22167
PC Reader, low-cost system for reading optical character for personal computer 4-2138
Penpad: handwritten input for computers 4-5524
scanners, review 4-5526
Siemens OCR 2481, use in unpacking *(German)* 4-8867
theory of learning expansion *(Japanese)* 4-11101

optical choppers *see optical elements*

optical coatings *see optical films*

optical collimators
semiconductor laser with collimating optics 4-21755

optical communication
see also optical links
fibre supervisory system 4-12112
high-voltage spark source, RF interference reduction by fibre optic signal transmission 4-16494
LAN/OCS, fibre-optic broadband system using PBX 4-5468
office automation use of information technology 4-13714
wireless computers, radio and light communications 4-17236

optical communication equipment

triplet state EPR spectra and spin Hamiltonians 4—23215

parameter estimation
3-D motion parameters and object surface structures estimation from image motion of curved edges 4—4043
U-D covariance factors, efficient type propagation 4—7303
abstract algebraic methods in the determination of the parameters of motion of a solid *(Russian)* 4—15322
active identification of stochastic discrete dynamic systems 4—15845
active system, optimal synthesis of functioning mechanism 4—15263
adaptive bootstrap estimation algorithm with application 4—416
adaptive Kalman filtering, recursive self tuning algorithm 4—7309
adaptive pole placement applicable to nonminimum phase systems of unknown order and unknown dead time *(Japanese)* 4—20282
adaptive predictive control system, proof of global stability 4—11350
adaptive receding horizon controllers for discrete stochastic systems 4—671
adaptive servomechanism controller structure 4—20352
aircraft parameter identification by Gauss-Newton minimization technique using flight test data 4—12021
algorithm for estimating the order of a system *(Spanish)* 4—19987
ARMA models, system order estimation by ladder canonical forms 4—10914
ARMA spectral estimation based on partial autocorrelations 4—11129
ARMA systems, minimax estimation 4—346
array processing, parametric methods 4—15327
artificial satellites, recursive attitude determination from vector observations using direction cosine matrix identification 4—20964
autoregression computing 4—8208
autoregression processes in stochastic control problems 4—15864
autoregressive and moving-average model, parameter estimation, fast calc. *(Japanese)* 4—11018
bearings only target tracking, fundamental properties and performance of nonlinear estimators 4—508
bilinear systems, identification using relay feedback 4—686
biofeedback learning, systematic model 4—7463
block pulse function appl. in identification of parameters of nonlinear time-varying systems 4—385
capital budgeting decisions with unknown cash flow parameters, value of perfect information 4—11205
cardiopulmonary parameters estimation using quasi-optimal inputs 4—11289
cerebral transit stochastic model of, numerical solution 4—11272
classification and linguistic characterization of non-deterministic data 4—7239
commercial vehicle stress analysis, multivariable identification 4—11269

parameter estimation continued
complex dynamic systems with judgement functions, parameter determination method, diesel engine appl. 4—4431
complex system identification, method of a common parameter 4—19989
continuous time linear estimation problems, recursive input-output and state space solutions 4—3972
continuous time system identification, appl. of Ljung's corrected extended Kalman filter 4—414
continuous-time system identification on compact parameter sets 4—11025
continuum models, spatially varying coefficient estimation 4—11023
convergence analysis, geometric aspects 4—418
credible and HPD intervals of the parameter and reliability of Rayleigh distribution 4—366
data-based algorithm for choosing the window width when estimating the density at a point 4—15318
deadbeat adaptive tracking system, design method 4—11430
decentralized systems, minimal realization 4—11390
delay systems, parameter identification using discrete approximation methods 4—20381
destination choice analysis, incorporation of trip chaining 4—15705
discrete l_1 linear estimation, online adaptation 4—19995
discrete time systems, finite interval smoothing 4—15449
discretised regression models with perturbated measurement data, regulation methods, model selection and parameter estimation *(German)* 4—3974
distributed parameter systems, real time parameter identification using Lyapunov design method 4—4274
distributed parameter systems, real time parameter identification using Lyapunov design method 4—4275
distributed parameter systems, state parameter estimation problem 4—3970
disturbed transient signals, parameter estimation by system identification methods 4—15466
doubly recursive algorithm for system identification from nonstationary cross-sectional data 4—11026
dynamic system, sequential parameter estimation for incomplete obs. 4—19990
dynamic systems, prediction method *(Chinese)* 4—7175
dynamic systems models, parameter sensitivity calculation, computing methods evaluation 4—6378
energy cost relationship to economic growth, ETA-MACRO computer model 4—4115
energy economic systems forecasting, small integrated model, Greek system appl. 4—7388
enzyme reaction systems, parameter identification using model reference adaptive techniques *(Japanese)* 4—19969
evolutive systems, tree structure parameters, choice and determination *(Polish)* 4—19968
exciting test signal, influence on results of estimation methods *(German)* 4—11016
experiment planning and data processing by method of max. equal-likelihood 4—15181
exponential signals by method of weighted moments *(Russian)* 4—4067
exponential smoothing parameter, evolutionary operation 4—15575
facilitated-diffusion problems anal. 4—4159
fixed point existence in parameter identification *(Japanese)* 4—20371
folded equations for a Weibull maximum likelihood ratio test 4—362
forecasting accuracy, recursive Kalman filter forecasting 4—15441
frequency characts. approximation, multidimensional optimisation *(Czech)* 4—15310
frequency identification by complex spectrum *(Japanese)* 4—11146
fuzzy set theory, parameter estimation and tracking 4—11024
game systems of extremal control 4—11359
Gauss-Newton method improvement information index 4—12289
generalised least squares and auxiliary variable method comparison *(German)* 4—3975
heating system, self-tuning control, microprocessor based, implementation 4—11659
highly nonlinear plants, adaptive control 4—11479
human observer and decision maker model 4—15513
identification, optimal inputs 4—20005
identification of deterministic linear system with variable time-delay 4—387
identification of distributed-parameter vibration systems 4—408
identification of linear time varying differential systems amid modal disturbances 4—386
identification of multivariable systems using instrumental variable methods 4—390
identification of noisy distributed parameter systems using optimal stochastic approximation procedure 4—406
industrial processes, sequential predictive control 4—11788
industrial production plants, identification method *(German)* 4—11382
input signal synthesis for parameter estimation with output power constraints 4—400
instrumental variable method for stochastic subsystem identification 4—392
integrated approach to member selection and parameter estimation for Pearson distrib. 4—15319
inverse normal distrib., variance and other characts., unbiased estimates 4—19872
ionosphere parameter estimation using stochastic signals *(Russian)* 4—4086
Kreisselmeier discrete adaptive observer, error analysis 4—11021
large-scale systems, decentralized suboptimal controller for low sensitivity *(Korean)* 4—7535
least squares estimation problem with degenerate covariance, initial value solution 4—4070
least squares lattice algorithms, pure time updates 4—3971
lime kilns, mathematical modelling and computer control 4—11646
linear automatic control system, interrelationship of structure and parameters 4—7491
linear continuous time systems, two-stage bias correction estimators based on generalized partitioning estimation method 4—377
linear discrete multivariable systems with process noise, identification and control 4—15833
linear discrete time dynamic systems, modified algorithm for least squares identification 4—3959
linear discrete time systems, model reference adaptive control *(Japanese)* 4—7551
linear dynamic systems with two segment piecewise-linear asymmetric nonlinearity, discrete time adaptive control 4—11418

parameter estimation continued
linear estimation problems, increasing efficiency of method of sequential decomposition 4—7215
linear noise free systems, optimal one step identification algorithm 4—3948
linear regression coefficients, estimation as antagonistic game *(Russian)* 4—7135
linear stochastic distributed parameter systems, parameter identification method *(Japanese)* 4—20379
linear systems, maximum likelihood estimates from noise-corrupted measurements *(Rumanian)* 4—10970
local identifiability in linear compartment system, sufficient condition 4—4172
LOLITA, log linear modelling in tables 4—6327
M/G/1 queueing system, adaptive service control 4—11451
manipulator adaptive control in Cartesian coordinate system 4—21201
manipulator servo-control using model parameer estimation 4—4623
Markov parameter estimation, appl. in self-tuning multivariable regulator struct. *(German)* 4—4260
maximum likelihood objective function, perturbation analysis 4—11011
measurement error reliability of estimates 4—15284
mechanical articulation, optimal adaptive control for flexible transmission 4—4512
metabolic systems, minimal sample schedules for identification of dynamic models 4—7464
metabolism experiments, computational methods for screening pharmacokinetic parameters 4—7460
minimum variance control, parameter identification algorithms *(Japanese)* 4—15862
missile aerodynamic structure and parameter identification using extended Kalman filter algorithm *(Korean)* 4—20252
model reference adaptive system identification 4—395
modelling and simulation, book 4—3976
modified Kolmogorov-Smirnov test for Weibull distributions with unknown location and scale parameters 4—375
motion estimation based on multiple local constraints and nonlinear smoothing 4—11103
motion parameter estimation, real-time algorithms 4—11028
multicompartmental model for cell proliferation kinetics, model reference adaptive identification scheme 4—20239
multivariable adaptive regulators based on multistep quadratic cost functionals 4—670
multivariable linear discrete-time model-reference adaptive control, parameter adjustment algorithm *(Japanese)* 4—15844
multivariable systems identification *(German)* 4—15325
multivariate statistical analysis, predicting the number of training samples needed 4—11014
neutral system, parameter estimation of threshold function 4—4154
noisy distributed parameter systems, simple ‘in structure’ estimation algorithm for space dependent parameters 4—11467
noisy linear multivariable systems, approximate realisation 4—15273
noisy signals, adaptive identification and filtering 4—15482
nonlinear approximation in control problems 4—15776
nonlinear distributed systems under noisy observations 4—407
nonlinear functional differential equations, estimation of delays and other parameters 4—15889
nonlinear least squares model fitting, resolution limits 4—11009
nonlinear least-squares parameter identification with fixed length data window, appl. 4—11226
nonlinear stochastic autoregression processes, identification *(Russian)* 4—7218
nonlinear stochastic systems, exponential least squares method ·appl. *(Japanese)* 4—7563
nonlinear systems, parameter estimation, structure detection and model validity 4—20008
nonlinear systems, real-time parameter estimation schemes, convergence study 4—345
nonlinear systems containing parameter uncertainty, design methodology 4—11486
nonstationary nonlinear systems, modelling method *(Japanese)* 4—10982
on-line eigenvector algorithms for the identification of dynamic systems 4—405
online identification and fault detection of industrial processes 4—988
onlinear least squares estimators, design via imbedding method given covariance specifications 4—3968
optimal finite-dimensional recursive identification in a polynomial output mapping class 4—15317
orthogonality correction in the conjugate-gradient method 4—15320
parallel processing algorithms for system parameter identification 4—404
PARCOR estimation via projections, appl. of normalised ladder form of residual energy ratio algorithm 4—4073
performance criteria for special applications *(German)* 4—15324
periodic autoregression, statistical anal. 4—15309
periodic test signals, for parameter estimation of linear dynamic modes *(German)* 4—15855
population dispersal and tissue bulk flow models, parameter estimation techniques for transport equations 4—591
population statistics, maximum likelihood estimation 4—10983
population stochastic differential equation models, population extinction probabilities and estimation methods 4—348
process variables estimation from noisy signals 4—4526
product function control, using computer interactive meas. techniques 4—383
pseudo-linear regression algorithms, asymptotic accuracy 4—11013
quasioptimal algorithm for estimating a process with measurable parameter 4—15313
radiopharmaceutical data, Fourier transform analysis 4—4161
rate-of-change estimation for process parameters, tunable filters 4—7847
recursive algorithm for ARMA processes 4—20010
recursive least square parameter estimation method: the optimisation problem and its direct solution *(German)* 4—21214
recursive least-squares parameter estimation, minimised error criterion 4—7214
recursive system identification, partitioned state algorithms 4—11022
reliability in renewal flow analysis 4—15285
residual averaging method for process identification 4—410
respiration, noise models 4—11287
river water level regulation by adaptive control of reservoir trap 4—11603
robots operating in nonstationary environment, evolutionary adaptation of control processes 4—1347
robust real-time identification of linear multivariable systems 4—388

parameter estimation continued
rotation invariant texture classification using circular random field models 4—4036
satellites, orbital parameter estimation using extended Kalman filter *(German)* 4—8044
self testing systems, learning system parameters for improving diagnosis 4—15286
self-adjusting controllers comparison, operating in finite number of steps *(Slovak)* 4—20348
self-tuning and adaptive control 4—11438
ship autopilot, self tuning, theoretical design 4—8026
ships manoeuvring equations 4—20001
short run demand for money, static and dynamic forecasting 4—11217
shrinkage estimation of the exponential scale parameter 4—364
shrunken estimators of Weibull shape parameter in censored samples 4—363
signals in counting observations, optimal orthogonal expansion for estimation 4—504
signals in white Gaussian noise, estimation using optimal orthogonal expansion 4—503
simplified estimation of the parameters of exponential distribution from samples censored in the middle 4—7139
simultaneous multialternative signal detection, design of optimal algorithms 4—482
single-input single-output linear systems, design and application of reduced-order adaptive observer 4—15858
spatial logic, spatial relationships of an object to its surroundings 4—15345
sponge iron production process simulation 4—20742
standard times definition using sampling distribution of the mode 4—11175
state-space models, linear, modal order reduction by parameter optimization *(German)* 4—15787
static systems, maximum likelihood approach to two stage estimation 4—15282
statistical estimates divergence, adjustable, sliding intervals of observations 4—11005
steel industry self tuning controller appl. 4—11800
stochastic processes, smoothing estimation, change of initial condition formulae 4—19873
Storm-Liouville equations with many parameters in space of type L_2, product solns. 4—16644
structural dynamics systems, identification using least-square lattice filters, large space structures 4—8038
structural output distinguishability of parametric models, relations with structural identifiability 4—19992
structural system identification in frequency domain *(German)* 4—7188
structure characterisation methods, simulation study 4—7220
suboptimal L Q control problem using reconstructed state feedback control law *(Japanese)* 4—15828
suboptimal solution to the adaptive filtering problem *(Slovak)* 4—15527
symmetrical best estimation functions and normal distribution acceptance in linear models with convex loss functions *(German)* 4—15173
synchronous generator parameters, proper and system, determined from state eqns. *(German)* 4—3234
system parameter identification developments, survey 4—396
temperature regulation, human system in air, statistical model 4—7455
three-dimensional motion parameters of rigid objects with curved surfaces, uniqueness and estimation 4—20048
time domain modal parameter identification and modeling of structures 4—11332
tracer kinetics, efficient algorithm for discrete modelling 4—7456
two car collisions, injury threshold model 4—565
two filter smoothing formulae using diagonalisation of Hamiltonian equations 4—490
undisturbable stochastic systems, optimal structurally partitioned filter, basic theory 4—3938
undisturbable stochastic systems, optimal structurally partitioned filter, stability and asymptotic behaviour 4—3939
unidentifiable linear systems, complete parameter bounds and quasiidentifiability conditions 4—11278
variable forgetting factors in parameter estimation 4—399
vascular transport function estimation using model-free deconvolution techniques 4—7461
voltage transformer tap position estimation 4—11706
Weibull model, non-informative and practical Bayesian confidence bounds for reliable life 4—19976
Weibull shape parameter selection using adaptive estimation 4—374

ORIC centepods 4—3592
Oric games 4—14778
Oric-1, tape verifying, machine code routine 4—10558
Oric-1 Space Invaders program in BASIC 4—10565
OS-9 operating system for Color Computer 4—22626
Osborne 1, graphics program in BASIC 4—2403
Osborne microcomputer user's experience following vendor insolvency 4—19742
Osbreak for Osborne 1, break key provision for modem port 4—21879
Otelo game of strategies, computer programs *(Spanish)* 4—23796
outline and recommended retail price of a selection of microcomputers 4—14754
output formatting program for Atari 4—6788
output line construction 4—6786
Pac-Man arcade game for 16K ZX-81 4—23767
pandiagonal magic squares, TI-59 algorithm and program listing *(German)* 4—14075
pattern drawing program 4—6795
PAWS: a personal ATLAS work station 4—21141
paycheck analysis 4—14758
Peanut, IBM's home computer 4—5295
peripherals for home computer systems 4—10518
peripherals for home computers 4—16998
peripherals for home computers in 1999 4—17528
Personal Bibliographic Systems 4—6300
personal computer: a necessary instrument or a management toy? *(Dutch)* 4—21833
personal instruments *(Italian)* 4—1256
personal scientific computing environment: a new approach to power industry computer applications 4—23356
personal telecommunication costs 4—10520
physically handicapped user computing: external keyboard for microcomputers, esp. Epson HX20 4—14753
Pied Piper, features 4—5350
Pinball Construction Set 4—23732
Plane Annoying, puzzle for Sinclair ZX81 4—23751
plotting data with character graphics in BASIC 4—10579
poker game program, in BASIC *(French)* 4—23728
political economics planning game, for teaching purposes *(German)* 4—3478
portable and transportable computers 4—21823
portable computers, market survey 4—5329
portable computers, restrictions on aircraft 4—3581
Progaid toolkit program for ZX-81 4—22581
program transportability between VIC-20, PET and Commodore 64 computers 4—19435
programming of personal computer, book 4—3630
Prolog comparison to Lisp 4—2435
purchase problems and guidelines 4—19806
Quadlink, IBM adaptation board for Apple programs 4—17592
quiz program, general multiple choice 4—19351
radio teletype modem, construction and connection, digital data communications application 4—1964
Rainbow 100, marketing 4—1922
random access file input output 4—5214
recreational software 4—23746
Rescue, data management program for IBM PC 4—9358
ROM routine usage from BASIC on VIC and C64 4—6816
RTTY, IBM Personal Computer appl. 4—10228
Runway 180, game listing in BASIC 4—6796
sales losses in low-end-of-the-market microcomputers 4—6921
Samurai S16 *(German)* 4—17101
science fiction adventure games from Avalon Hill 4—19408
SECTOR, adventure game on Apple II using BASIC *(French)* 4—19389
Sega 3000 home computer *(French)* 4—21767
Shark Treasure, graphical computer game for Dragon 4—23748
Sharp's pocket computer: its design, philosophy and functions 4—5280
Sharp PC-1211 and PC-1251 pocket computers, programming tricks *(German)* 4—17102
signed arithmetic usage, missed sign comparisons on 6502 computers 4—6814
signed binary multiplication with the MC6809 4—6817
Simulated Computer II 4—23581
simulated DOS for ZX-81 in BASIC and machine code 4—10550
Sinclair microdrive and RS232 interface, practical use 4—21690
Sinclair QL review 4—17123
Sinclair Spectrum, alternative uses of 'open' and 'close' for microdrive 4—23762
Sinclair Spectrum, arcade game in BASIC, Maggot Stomp 4—10567
Sinclair Spectrum, software and games 4—10561
Sinclair Spectrum assembler program in BASIC 4—10571
Sinclair Spectrum games review 4—3628
Sinclair Spectrum voice synthesiser 4—17567
Sinclair ZX81, arcade game in BASIC, Scram-81 4—10566
Sinclair ZX81 Merge facility, program listing in BASIC 4—10572
Sinclair ZX 81 auto-repeat panel, using transistor switches, Schmitt triggers, bridging diodes *(German)* 4—21860
Sinclair ZX Spectrum microcomputer review 4—5339
Sinclair ZX-81 line renumbering program in BASIC 4—10570

personal computing continued
sliding tile puzzle for Dragon microcomputer 4—3605
software, instructions in machine code and BASIC programs 4—3569
Software Arts TK! Solver, an equation solver 4—14266
software directory for IBM Personal Computer 4—3618
software distribution via viewdata 4—9768
software life cycle parameters, interactive macro-estimation, via personal computer, customer/developer communication improvement 4—22328
software package capabilities and selection criteria 4—18253
software tools for personal computer linking to mainframe, survey 4—22261
Space Invaders-type game program listing, Squadron, in BASIC *(French)* 4—14751
space saving programming technique 4—2483
Space Thief 4—14762
Spectravideo SV318, MSX standard personal computer 4—1692
Spectravideo SV-318 personal computer 4—17142
Spectrum, routine for filling in irregular shapes, machine code 4—10552
Spectrum time slider game 4—3587
speech recognizers for business software 4—13190
speech synthesis and recognition 4—22235
spelling quiz program 4—6690
Spirograph-type curve plotting by computer 4—17730
spreadsheet program for mech. design calcs. 4—3426
Sprite, graphics program for Sinclair Spectrum 4—23753
sprite animation program for BBC micro 4—23769
sprite editor for Commodore CBM 64, BASIC, machine code 4—10551
squash, game for PC 1500 *(French)* 4—19392
Step One personal computer by Ericsson *(German)* 4—17094
Stevens Institute of Technology, personal computer plan 4—23676
strategy games and simulations from SSI 4—19407
string/substring searching, rapid, Applesoft BASIC program 4—9120
submarine game for ZX-81, in BASIC 4—3607
Submarine mission computer game 4—3593
submarine simulations for commodore 4—19422
summer computer camps for schoolchildren 4—14872
Super Barricade, two-player game for BBC Micro 4—3601
survey of Forth, Pascal, BCPL, LISP, for use on microcomputers 4—9165
Swag, basic computer game for Atari 4—23758
technological revolution, implications 4—6943
telecommunications software 4—10513
telecomputing, bulletin boards 4—23741
telegames, computer games by phone 4—6789
telematics and the microcomputer in health care 4—9609
telephone directory and dialling program for TI computer, in BASIC 4—10240
telephone directory management program 4—19447
teletext, telesoftware electronic publishing system to serve the microcomputer 4—6197
tennis game for ZX81, in BASIC and machine code *(French)* 4—3571
terminal emulator for Commodore 64, machine language program 4—10242
Texas Instruments' TI-99/4A microcomputer 4—21822
Texas Instruments Professional Computer 4—5286
text-processing on BBC microcomputer, program 4—23792
ThinkTank idea processor 4—23747
TI 99/4A games, review 4—19401
TI computer, character set 4—10537
TI personal computer, comparison with IBM model 4—1852
TI-99/4A software for TI home computer *(German)* 4—23791
Timex 1000 memory expansion, artificial, programming techniques 4—19433
top ten computer games 4—14776
Tortoise II graphics language for ZX spectrum 4—3594
Toshiba T100/T300 personal computers, features and system layout 4—1931
touch typing, educational programs 4—19283
TPC-8300 microcomputers, printer/plotter, peripherals *(German)* 4—5052
trackball-interfacing techniques for microprocessors 4—12830
Transend PC, communications package for the IBM PC 4—10220
Triumph-Adler alphatronic PC *(German)* 4—5305
TRS 80, arcade games, review 4—19404
TRS-80 Model 100 personal computer 4—17114

- CO 5000 compiler for translating source programs of PN 5000 technical oriented language *(German)* 4—13453
- Cobol compiler for micros and mainframes 4—2467
- code-generator automated construction 4—2473
- compiler-compiler as a tool for CAD systems development 4—10083
- control flow aspects of semantics directed compiling 4—9217
- CP/M, speed of compiler languages, comparison for numerical manipulations *(German)* 4—9224
- cross-compilers for microprocessor-software development 4—13209
- DML parser 4—13454
- Echonet compiler 4—5853
- Einstein compiler for Apple computers 4—22545
- error-correcting LL(1) parser generator 4—9219
- Ferranti Silicon Design System 4—23386

program compilers continued
flow graph machine models in microcode synthesis 4—22364
FORTH, compiler program for ZX-Spectrum 4—23763
FORTH compiler and text interpreter *(German)* 4—9168
Forth language. III 4—9170
FORTRAN 77 compiler, design provides software transportability 4—17912
FORTRAN compiler, optimising, quality of realisation of index variables 4—2472
general predicate transformer and the semantics of a programming language with goto statement 4—5850
general purpose, implementation using LL(1) parsing *(Japanese)* 4—13473
generator for readable recursive descent parsers 4—13466
horizontal microprograms, global compaction using generalised data dependency graph 4—5129
IBM Series/1, Event Driven Language compiler and EPROM writer 4—2469
ICES system for use in engineering fields 4—14611
incremental shift-reduce parsing 4—5852
integrated compiler-interpreters 4—9229
JRT Pascal compiler *(German)* 4—5855
LILA compiler writing system for Ada 4—22556
Little META Translator Writing System 4—5858
liveness analysis of message-based multiprocess systems 4—2470
loop cleaning 4—17913
LR parser for grammars with epsilon productions 4—4899
microcode generation with development systems 4—8998
microcomputer design calculations, speed improvement using faster algorithms and compiled programs 4—23618
microprocessor, tutorial series *(Spanish)* 4—2475
Microprocessor Basic Programming Language, compiler, object program generation 4—22468
microprocessor development systems based on personal computers 4—12568
microprocessor-based mixed event programmable controllers, development system, universal compiler, CCDL 4—22540
Modula II compiler of Modula-2 language 4—5856
Modula-2, lexing and parsing 4—9188
Modula-2 language, computer architecture 4—5128
modular compiler-building methodology based on subroutines set in FORTRAN 4—22571
natural language interface-two-way 4—5860
nBASIC: a structured preprocessor for MBASIC 4—22548
NS16000-based systems with Unix, Genix and compilers 4—2529
optimisation and code generation 4—17905
optimizers, tight object code 4—13455
OS/ES 6.1 system, modification 8, Robotron additional software facilities *(Czech)* 4—18028
parallel P-code for parallel PASCAL and other high-level languages 4—9214
parallel parsing 4—21273
parser table generation *(German)* 4—8229
Parsley, compiler-compiler 4—9244
Pascal compiler, VLSI implementation of parsing chip 4—8439
PASCAL compilers from IBM and PASCAL/MT+, comparison *(German)* 4—17908
PASCAL interactive program development system 4—22504
PASCAL to assembler code interface 4—2468
PBE, Programming by Examples, extending its powers 4—5708
personal computer, programming, book 4—3630
PLATO, PLA/FSM compiler 4—17929
portable operating systems, UCSD p-System 4—9333
portable Pascal compilers from Digital Research 4—9228
program access control policies, extensions 4—9180
Prolog, main issues in implementing the programming language 4—5839
PT, Pascal subset, sentence generator for compiler 4—9235
regular expressions 4—22563
relational data bases in the design of program construction systems 4—17603
requirements analysis for Ada compilers 4—13457
resident compiler generation for microcomputer *(Russian)* 4—5857
RISC architectures, high-level function compilation 4—21605
SCRAP, language implementation *(Afrikaans)* 4—17875
SEMA-4 syntax-directed compiler compilers 4—17926
semantic description language implementation 4—17898
semantics-directed compiler generator, simple, control flow treatment 4—4951
Sphere, realtime systems development tool 4—13456
split stream processing, shuttle program, in Pascal 4—22547
static anal. features survey of FORTRAN and COBOL compilers 4—22565
subset PASCAL, design and implementation on UNIX using Yacc and Lex *(Japanese)* 4—22472
symbol processing mechanisms from specifications 4—2459
syntax driven COBOL compilers 4—17920
syntax-error-handling technique and its experimental analysis 4—9218
systems language, compiler writing 4—22549
table driven cross-compiler, FACTOR test language translation to machine code appl. 4—22560
technology advances 4—22567
telecommunication systems, software engineering aspects 4—23542
Tiny PASCAL compiler for TRS-80 level II *(German)* 4—17911
uniform compiler system development 4—22543
Unix, Genix and compilers for NS16000-based systems 4—2529
user debugging information obtained by program transformation by optimizing compiler 4—22594
validation process, consumer issues 4—5817
Vic-20 monitor 4—2465
XR project for compiler development and transportation 4—17917
YACC preprocessor for parsing attributed grammars 4—9329
Z8000 and Z80000, features suitable to Unix 4—1697
ZR-81 GT compiler 4—2464
ZXGT compiler, design and shortcomings 4—2466
Si compiler, high level language code to NMOS layout specification 4—23468

program correctness proving *see programming theory*

program debugging

enzyme-inhibitor modelling at Merk macromolecular graphics facility 4—23192

protocols
8th Data Communications Symposium, Conf., North Falmouth, MA, USA (Oct. 1983) 4—13047
adaptive protocols, aggregate model *(Russian)* 4—17298
adaptive token-ring strategies for real-time traffic in computer networks 4—22091
AlaskaNet for decoding data communication protocol 4—22033
algorithmic automata, protocol modelling *(Russian)* 4—17295
ALOHA channels with multipacket messages and ARQ-type transmission protocols 4—5499
ALOHA slotted systems with multipacket messages and ARQ-type protocols, throughput anal. 4—21999
analysis of protocols 4—8837
ANSI videotex/teletext interchange standard, NAPLPS, conformance requirements 4—13944
ARQ microprocessor error control on channels with delay and burst noise 4—17370
ARQ protocols, steady-state and transient delay anal. 4—21952
ASCII to EBCDIC needed to allow mainframes and micros to communicate 4—8712
asynchronous and synchronous operation of communication protocols 4—17237
ATE LAN, data management software and protocol aspects 4—22043
atomic broadcasting protocol 4—17347
ATP-2 self-adaptive multiple-access protocols 4—22110
automated development system 4—21918
automated protocol verification experience 4—5493
automatic process control via inter-computer networks, comparative study *(German)* 4—4518
automatic repeat requests protocols, hybrid scheme for improvement 4—22121
Bildschirmtext, charges reduction by right concept for information storage and programming *(German)* 4—13973
BLAST, blocked asynchronous transmission protocol, with synchronous error detection technique 4—21865
broadband LAN protocol architecture, overview 4—21972
bus-controlled systems, control lines, protocol, series and parallel interrogation *(French)* 4—21910
business data usage of OSI 4—22027
Byzantine agreement method without authentication 4—12977
C-PODA protocol for satellite data communication channel 4—8109
CCITT data communications standardisation trends *(Japanese)* 4—12892

protocols continued
CCITT secondary area network simulation by microcomputer, directory routing algorithm 4—22125
CCITT secondary area network simulation by microcomputer, packets routing adaptive algorithm 4—22126
cellular radio with hybrid voice channel assignment, simulation of signalling protocol 4—3396
character-mode X.25 terminal, multipurpose appl. 4—2201
closed-ring data network environment, set initial program load, unsolicited return 4—8816
combined URN and TDMA scheme for multiple-access protocols in local area networks 4—22097
Commodore CBM 8096/8032 microcomputer as VDU *(German)* 4—5374
common data communications protocols in the FRG 4—12943
communication between jobs, using resident library 4—5874
communication techniques, book 4—2093
communications links between computers, establishing them 4—12959
communications protocol design methodology 4—5498
communications protocol functions checklist, open system interconnection seven-layer reference model 4—13043
communications protocols overview 4—21925
COMPCON 83 Fall conf., Arlington, VA, USA (Oct. 1983) 4—13032
complexity of designing distributed protocols 4—22128
computer communications, overview 4—5490
computer communications, protocol considerations, report 4—8752
computer graphics systems, specification techniques 4—13304
computer network diagnostics, efficiency and operation *(Russian)* 4—17354
computer network interworking principles, gateway and addressing 4—17371
computer networks, performance prediction 4—5494
computer networks, transformation *(Russian)* 4—17408
computer networks for packet commutation, conference, Riga, USSR (Sept. 1983) *(Russian)* 4—17388
computer standards, language, coding and hardware 4—14933
concurrent communication and synchronization mechanisms 4—22503
connection-oriented internetwork protocol 4—12934
content-induced transaction overlap, computer communication 4—17345
content-induced transaction overlap for multi-access communication 4—22079
contention-free local area network technique with high channel utilization 4—22112
control protocol for information channel with packet deformation *(Russian)* 4—16499
conversion for linking personal computers to central data processing system 4—17362
cooperative symmetric algorithm for real-time LANs, performance anal. 4—22081
correctness analysis of network protocol functioning *(Russian)* 4—17406
CS 80, command language for improved disc protocol 4—17273
CSIRONET portable file transfer and spooling system 4—13278
CSMA and CSMA-CD protocols, performance eval. *(Japanese)* 4—8834
CSMA-CD protocol for LANs with dynamic priorities and low collision prob. 4—21975
CSMA/CD access protocol with deterministic contention resolution for LAN 4—21976
CSMA/CD local area network, performance analysis using 1-persistent protocol with backoff algorithms *(Japanese)* 4—12998
CSMA/CD networks, load balancing protocol 4—22069
data communication equipment, tabular review *(Swedish)* 4—17234
data communication protocol testing and languages 4—2005
data communications, state of the art 4—17241
data link protocol test 4—8753
DATAKIT packet switch for universal data transport system 4—21971
DBMS, procedure language interface to proposed ANSI standards 4—18059
DCNA, data communication network architecture, fifth version development *(Japanese)* 4—8803
DCNA fundamental protocol implementations, communication performance *(Japanese)* 4—8805
DCNA terminal access method for CMP 2 *(Japanese)* 4—8800
DCNA terminals introduction, terminal access method conversion *(Japanese)* 4—8801
deadlock problems, appl. of Boolean algebra and resolution algorithm 4—13546
Decnet/SNA gateway server 4—17317
description using parallel logical control algorithm language *(Russian)* 4—17407
digital data communications message protocol, formal description 4—8754
digital local exchanges, function enhancement to accommodate digital terminals 4—4765
DIPS communication management program development, enhanced version, CMP2-R 3 *(Japanese)* 4—8799
distributed consensus, minimal synchronism needed 4—22074
distributed data processing, protocol converter and cluster controller role 4—5465
distributed database systems, multiple copies of data, time and cost evaluation schemes 4—22723
distributed databases, SIRIUS-DELTA architecture as framework for cooperation 4—18060
distributed local area network packet protocol for combined voice and data transmission 4—21980
distributed office and factory systems, conf., New York, USA (June 1983) 4—13000
distributed protocol systems considered as an engineering discipline 4—5497
distributed system protocls *(Spanish)* 4—17375
distributed systems and their protocols, Client-server model 4—13024
distributed systems and their protocols 4—21950
dual check field generation in computer networks 4—2072
Edimath, interactive system for mathematical text processing 4—13348
EFT transaction response message authentication 4—13771
emulation and analysis tool 4—17366
Ethernet, protocol scheme 4—21934
Ethernet, retransmission protocols 4—5488
Ethernet protocols, CSMA/CD networks, prioritized dialogue 4—22068
exception handling in communication protocols 4—13054
Expressnet: a high-performance integrated-services local area network 4—21978
extended asynchronous protocol, investigation 4—12952
FARA/CS access protocol, simulation 4—22077

protocols continued
  Fastlane local network for ATE data collection 4—8807
  fibre-optic spread-spectrum multiple access data loop, design, performance and protocol 4—12984
  file treatment in heterogeneous network *(Italian)* 4—9086
  formal description by specification language *(Hungarian)* 4—2075
  formal descriptions of protocols *(Russian)* 4—17296
  go-back-n ARQ protocol, performance characts. rel. to network topology 4—22130
  graphics protocol 4—12988
  H-Network—a high speed distributed packet switching local computer network 4—22095
  HDLC protocol specification and its verification using image protocols 4—8811
  heterogeneous guard locking protocol 4—22676
  high data link control protocol, delay anal. 4—22122
  high level network protocols, security mechanisms 4—8781
  high-level data link control, verification by algebraic specification method *(Japanese)* 4—2086
  High-level Data Link Control 4—17329
  higher-layer protocols for terminal applications in an inter-university computer network *(Polish)* 4—17358
  hybrid-multiple access protocol for data and voice packets on LANs 4—17373
  Hyperchannel network links 4—5452
  I^2C bus in consumer applications 4—21986
  IBM's System Network Architecture, reasons for success 4—5454
  IBM 2780 contention protocol, standard 4—17238
  IBM 3270 compatible systems 4—6831
  IBM systems, X.25 networks support 4—4782
  IEC-bus communication functions in multiprocess operation system for microcomputers *(German)* 4—22644
  IEEE 802.4 Token Bus standard and ANSI X3T9.5 Local Distributed Data Interface 4—17319
  IEEE 802 token-passing bus LAN, error handling 4—21969
  IEEE token-passing bus medium access control LAN protocol validation and evaluation 4—21970
  IGES: A key to CAD/CAM systems integration 4—14556
  integrated digital access design for ISDN 4—5439
  integrated satellites and terrestrial digital networks, architectural and interface issues 4—22115
  inter-mode communication in local area networks 4—22123
  interacting, process formalisation *(Russian)* 4—17405
  interacting process analysis *(Russian)* 4—17409
  interchange device for interconnecting devices of different communication protocols 4—17275
  interconnecting heterogeneous database management systems 4—18057
  interfacing between plotter and graphics *(Italian)* 4—9096
  ISDN, Swedish digital network *(Swedish)* 4—21930
  ISO model of open systems interconnection 4—17324
  ISO OSI model 4—2042
  ISO reference model, higher levels *(French)* 4—2039
  ISO/NBS class 4 transport protocol for local area networks 4—13025
  Kathrein MFK51 radio and TV sound measurement receiver, used for common aerial systems *(German)* 4—8089
  Kiewit local area decentralised network 4—12945
  LAN, dynamic dispatching control of information *(Russian)* 4—22133
  LAN, physical level *(Russian)* 4—22136
  LAN, sliding window link level flow control, performance analysis 4—13057
  LAN channel level protocols *(Russian)* 4—22139
  LAN controller, COM 9026, for regulating token-pasing traffic 4—12962
  LAN token-passing schemes 4—12938
  LANs, broadcast protocol performance 4—13063
  LANs, integrated access method for multifarious traffic 4—4777
  LANs, multicast algorithm analysis 4—13062
  large mixed protocol networks, simulation model 4—3395
  large-scale crossbar switch, protocol issues of config. management and contention resolution 4—21023
  layered network protocols for packet voice and data integration 4—21921
  layered protocol implementations, test logic generation method 4—21539
  LMAC system for robot cooperation, synchronisation tools 4—6581
  load balancing bus accessing scheme 4—12973
  Local Area Data Transport—a packet-switched network for exchange area services 4—5438
  local area network, Banet, for distributed processing 4—21949
  local area network, fibre optic, with arbitrary topology 4—22003
  local area network, UniLAN, using UniLINK access method 4—17357
  local area network controller based on MIL-STD-1553, low cost 3 M bit/s 4—13018
  local area network protocol for real time appls. 4—22099
  local area network simulation methodology for factory floor networks 4—13026
  local area network with resource sharing 4—8853
  local area networks, architecture and protocol 4—2096
  local area networks, architectures and access protocols *(Italian)* 4—4770
  local area networks, effect of topology on latency and delay 4—13034
  local area networks, hybrid TDMA/CSMA accessing scheme, for variable traffic characteristics and operating delay metric minimisation 4—5487
  local area networks, optimal hybrid multi-access protocols 4—22108
  local area networks, protocols and standards development 4—21039
  local area networks, technical props. *(Dutch)* 4—22001
  local area networks, window-controlled multiaccess protocol 4—5486
  local area networks in a hospital setting 4—10005
  local area ring network, high speed, optical fibre, with register insertion access protocol 4—22004
  local network interconnection to long distance networks 4—5449
  local network performance 4—22002
  local networking and internetworking in the V-system 4—13049
  local-area bus system with controlled access, performance anal. 4—12971
  local-area network, filing and printing services 4—13298
  local-area network, multipacket ring type, throughput improvement 4—22082
  local-area network, NBSNET, operating experience 4—22086
  local-area networks, token-ring type, theoretical and exptal. performance 4—22083
  local-area networks-types, standards, user needs and future prospects, book contrib. 4—22039
  local/wide area networks interconnection 4—22047
  locking protocols for database systems, exclusive and shared locks 4—5947

protocols continued
  logically asynchronous process networks, protocol correctness *(Russian)* 4—17412
  lower bounds by probabilistic arguments 4—21370
  message delay analysis for polling and token multiple-access schemes for local communication networks 4—21981
  Message-Handling Systems and protocols 4—22024
  microcomputer based network, telecommunication modules *(Russian)* 4—22151
  microcomputer telecommunications, software considerations 4—23528
  microprocessor system design for networks *(Russian)* 4—22146
  military requirements for packet-switched networks and their implications for protocol standardization 4—1975
  mobile digital datalink for field work applications 4—8828
  modelling protocols, language descriptions *(Russian)* 4—17413
  modelling protocols using Markov chains 4—22078
  models, computer communication 4—12999
  movable slot TDM characteristics 4—22070
  multi-access systems, importance of feedback 4—22106
  multi-station point-to-point protocol for duplicate data processing centres 4—8821
  multichannel local area network protocols 4—21977
  multiparty protocols security in distributed systems 4—17376
  multiple access, window protocols for time-constrained communication 4—13055
  multiple access protocols, optimisation problems in design 4—22109
  multiple logical link protocols, design issues and complexity of implementation 4—5436
  multiple robot systems, local network architectures 4—5483
  multiplicity of conflicts estimation in multiple access channels 4—22073
  multiprocessing systems, decreasing arbitration overhead, method 4—12976
  multiprocessor system, interface design 4—12818
  multiprocessor systems, interfaces between protocol layers 4—8606
  national network standards, protocol testing 4—12967
  Nestar Plan 4000 LAN, layered approach to design 4—21974
  network management using value added networks 4—17305

DBMS functionality criteria 4—18793
decisional power, structural aspects 4—11296
Diophantine inference on a statistical database 4—18079
discrete random variables, observation generation 4—8222
distributed computing system, cluster analysis 4—13644
distribution functions 4—10875
document clustering, using macro retrieval techniques 4—3084
dynamic model of process, statistical methods *(Polish)* 4—20204
econometric model building, iterative regression appl. 4—15626
electronic laboratory data management, statistical analysis and graphics software system 4—18076
English hospitals, specialty costs, statistical approach based on cost component model 4—20244
EPS econometric time series software 4—19265
equipment breakdown, mathematical model of reliability *(Russian)* 4—355
erroneous medical payments, maximising restitution when auditing samples from more than one provider 4—15740
European Community Regions in 1970 and 1973, productivity in income distribution 4—20124
exact sampling distributions of the coefficient of kurtosis using a computer 4—14086
experiment planning and data processing by method of max. equallikelihood 4—15181
expert system for statistical estimation on databases 4—18111
extreme values estimation using regenerative simulation 4—15134
facsimile transmission at remote computer network nodes, memory performance 4—22087
factor structure comparisons, BASIC programs for microprocessors 4—14071
factorial anal. of correspondence, visual mapping of crosstabs 4—7146
failure detection, comparison of SPRT and GLR techniques 4—11003
failure protection repair time distribution, its effect on failure free operation 4—10990
failure rate model for memory devices 4—21746
fast sequential algorithms for the instrumental variables method 4—15476
Fisher and logistic linear and quadratic discrimination models, assessment 4—15132
fixed sample Bayes estimates, sequentially asymptotically optimal 4—19867
flood freq. anal., software design 4—10354
gamma distribution generalisation, nomogram and program for parameters selection *(Rumanian)* 4—6331
GENISYS data definition facilities 4—19271
glucose metabolism in humans, clinical studies, multivariate statistical approach to modelling compartmental parameters 4—605
GRAPHPAK: interactive graphics for analysis of multivariate data 4—14084
gravitational wave antennas, pulse processes anal. 4—15462
Guttman scalogram anal., BASIC program 4—14073
heavy duty electromobile motor reliability mathematical model 4—10105
Hermite distribution, model of demand during lead time for slow-moving items 4—20182
image coding, graph-theoretic approach to composite-source-model estimation 4—15374
INAKT, interactive nonlinear regression program for enzyme inactivation and affinity labelling studies 4—18857
index coding: a compression technique for large statistical databases 4—18742
industrial licence distribution pattern, statistical analysis 4—6311
inequality measure, appl. example *(German)* 4—19870

statistical analysis continued
infant and childhood mortality estimation by indirect technique, BASIC program 4—23249
inference in survey sampling 4—19862
information diffusion in social group 4—11295
information system designs 4—18789
interactive Markov chains with finite population 4—11297
interactive tools for EDA 4—14082
interrelated logistics performance variables, time series analysis 4—15750
laboratory data, minicomputer program for rapid graphical and statistical analysis 4—18856
Landsat data, multitemporal, principal components anal. for crop identification and land-use-mapping 4—3202
large economic database problems 4—19268
licensing information for electronics industry, statistical analysis using LIPS information system 4—9718
linear estimation problems, increasing efficiency of method of sequential decomposition 4—7215
linear models with highly correlated errors, relative efficiency of first difference estimator 4—15176
literary attribution and likelihood-ratio tests: the case of the Middle English Pearl-poems 4—14738
locally most powerful test for outliers in samples from the exponential distribution 4—15174
logical model GRASS for statistical databases 4—18113
loglinear model *(Hungarian)* 4—19878
LOLITA, log linear modelling in tables 4—6327
Mallows' C_L criterion and optimal ridge constants, generalisation 4—19868
market researches, questionnaire selection 4—11202
MASS, microprocessor applied statistics system 4—6328
maximum entropy spectral anal. extension, prior information inclusion 4—15435
means and standard errors, BASIC program to calculate 4—6322
medical expert systems, multiple strategies of reasoning 4—606
medical record management and information processing performance, statistical anal. 4—9579
meta data: an experience of its uses and management 4—19266
method bank for operational analysis, forecasting and planning *(German)* 4—18830
method oriented data exploration, ISMODE 4—18767
microcomputer IMSL libraries 4—14081
microcomputers and data analysis 4—9882
microprocessor based meas. system error analysis and simulation 4—3321
Minitab, design and implementation 4—9888
MIS performance, regression model 4—18233
mixed-integer programming approach to the clustering problem 4—7138
model evaluation in software metrics research 4—7087
morphogenesis in embryology 4—10037
MP/C performance evaluation 4—1662
multinational research project data and documentation integration 4—18786
multinomial logit regression, asymptotic efficiency 4—19866
multiple data anal. environments management and display 4—18783
multiple marketing data processing methodology, Onicescu informational statistics appl. 4—11201
multivariate data anal. 4—6325
multivariate statistical analysis, predicting the number of training samples needed 4—11014
multivariate statistical methods for medical survey analysis 4—9973
NASA's fundamental research program in MPRIA 4—7295
natural textures synthesis with the control of the autocorrelation and histogram parameters 4—462
negative binomial distribution, theoretical and practical impact 4—19869
nonlinear acceleration functions in life testing 4—15177
nonlinear estimation, online computation of Bayesian statistics 4—20392
nonstationary signals adaptive segmentation, efficient GLR algorithm 4—15481
normal variate generation by summing three variables 4—14083
online data bases and interactive analysis 4—18746
optimal tests for initialization bias in simulation output 4—15187
PACK SYSTEM and AUTOBJ/AUTOBOX 4—6326
papermaking, grey-tone evenness evaluation using band-pass filtering on video-scanning analyser 4—2144
Paste—a tool to put application systems together easily 4—18787
PATHDI program for computerized path diagrams on a line printer 4—5769
pattern recognition, mapping techniques 4—7257
pattern recognition, towards unification of syntactic and statistical recognition 4—452
personal computer and statistical applications *(Dutch)* 4—9874
piecewise linear approximation based on a statistical model 4—20050
PIGAS—an interactive statistical database management system 4—18788
Poisson distrib., exact tests of fit, in FORTRAN IV 4—252
portable FORTRAN Uniform (0, 1) generator implementation 4—14788
positron emission tomography, performance of maximum-likelihood reconstructions 4—14205
power system, modeling of fault-induced noise signals for computer relaying applications 4—3240
probability of order relation between the sample means taken from three normal populations 4—15175
pulsed phase-locked AFC system, fluctuation interference effect on noise band 4—4300
radar signal detectors, adaptive and insensitive, threshold build-up process when noise intensity changes anal. 4—8094
radio-telegraph signals, time distortions, statistical characts. determ. using microcomputer 4—14538
radionuclide studies, statistical processing of results using a small-size computer *(Russian)* 4—18842
RAM bit fail maps, pattern recognition 4—21734
random integer generators, empirical test 4—4895
RAPID: a statistical database managemeent system 4—9388
real-time statistical analysis of software operation, development systems and logic analysers *(French)* 4—13496
reconciliation of probability distributions 4—10913
recursive algorithm for ARMA processes 4—20010
refractory effects in neural counting processes with exponentially decaying rates 4—15737
regression analysis, passenger response to DC-10 disaster 4—15690
relational algebra, extension for summary tables 4—18792

statistical analysis continued
- relational database machine for efficient processing of statistical queries 4—18106
- reliability calculations for capacitor banks 4—6451
- repeated meas. with nonGaussian noise, optimal statistical processing *(Russian)* 4—19874
- research database support system 4—18108
- river flow analysis, pattern recognition appl. 4—7293
- road vehicle driver deceleration at T-junctions, regression anal. 4—20219
- Robotron 4200, test data evaluation *(German)* 4—9867
- Roman inscriptions legibility restoration, statistical matching of directional content of illumination source 4—11064
- S/N ratio automatic meas., using ISAAC/Apple system 4—21130
- SIBYL: an economist's workbench 4—19261
- signal detection algorithm, robust, based on approximation criteria 4—15423
- signal distribution density, nonparametric evaluation by normal kernel method *(Russian)* 4—11139
- SIMTBED: overview 4—9880
- simulation output data appl. 4—15183
- simulation run length control in the presence of an initial transient 4—15186
- simultaneous transformation of two variables, FORTRAN IV program 4—6324
- small business, improving competitive position using statistics 4—10765
- software for statistical computing on microcomputers 4—14302
- software package, Micro Data Analyser, for sophisticated statistical anal. 4—18494
- software package, user satisfaction analysed 4—14698
- software productivity data measurement 4—19774
- spectral estimation with rational log spectrum, two methods 4—15461
- spectral moment matching, rationale for maximum entropy anal. 4—15463
- spectroscopic two-dimensional data array processing by computers 4—12191
- SPSS and SPSS X implementation 4—9889
- standard times definition using sampling distribution of the mode 4—11175
- STATGRAPHICS, interactive data anal. and statistical graphics system in APL 4—6329
- stationary process variance, efficient estimate 4—664
- statistical control of optimisation 4—3927
- statistical models for physics data processing 4—382
- statistical processing of retrospective data for fault limiting automatic control systems in power networks *(Russian)* 4—20633
- statistical StatCat microcomputer 4—8688
- Statistics Sweden economic databases 4—19267
- stratification of finite populations, heuristic procedure 4—19863
- surgical prospective trials, use of microcomputer 4—3159
- SURVAN: a nonparametric survival analysis package 4—9883
- survival anal., data considerations 4—9884
- survival analysis software 4—9886
- survival models; GLIM use 4—9885
- switching surge statistical calc., application *(Chinese)* 4—14326
- symmetrical best estimation functions and normal distribution acceptance in linear models with convex loss functions *(German)* 4—15173
- system available on CSIRONET 4—2651
- task-scheduling algorithm, statistical study of performance 4—13534
- term frequency in searching, 2 Poisson model 4—3064
- texture classification with change point statistics 4—15406
- time series analysis programs 4—9887
- time series ARMA model identification by estimating information 4—7221
- variance estimation using staggered, nested designs 4—9875
- vision by computer, information theory anal. of sensor-array imaging systems 4—15431
- wind direction statistics calc. with computer routine 4—23258

absolute value code, fast 4—8465
abstract data types in Ada 4—22307
animation, photographing microcomputer graphics in TI Logo 4—6819
antenna pointing, latitude and longitude calculations 4—3366
arcade game for ZX-81, Scram-81 machine-code subroutines 4—19431
arm controller in Pascal Plus, occam and Edison 4—16197
assignment problem for sparse matrices, solution algorithm, in FORTRAN 4—1377
Atari interrupt handling routines in BASIC 4—17985
bar graph program 4—5763
BASIC teaching in schools, in BASIC 4—87
BIOS interface and screen-display disk storage, in BASIC 4—13225
branch-and-bound algorithms, virtual memory support 4—22393
bubble sort algorithm, run time derivation, empirical 4—22410
Color Computer, voice input subroutines 4—23521
Color Computer text editing routines 4—2687
columns, footings and gates, computation through moments of area, in FORTRAN 4—3423
Commodore 64, graphics routines in BASIC 4—23793
control algorithms for microprocessors and storage requirements *(Spanish)* 4—23551
control code generation and error correction subprograms *(Czech)* 4—2408
control of cartesian robot, in Earth 4—8189
data-input errors, routine to avoid, in Pascal 4—17731
daylighting model for building energy simulation, Fortran programs 4—10349
disk handling routines 4—2481
division of 32-bit unsigned numbers, in 8085 assembly language 4—9119
electric power system, power flow distrib., optimisation *(Russian)* 4—14356
electronic circuit transient anal., global error estimation and control 4—14377
encryption techniques, public key, in PASCAL and assembly language 4—5773
enumerative algorithm for finding Hamiltonian circuits in a directed graph in FORTRAN 4—254
ESBA2, subroutine package for solving elliptic boundary value problems 4—9873
finite element analysis, brittle fracture in FORTRAN 4—10329
FORTRAN subroutine for computing the optimal estimate of f(x) 4—1357
generic Sorting in Modula-2 4—22435
geometrical plotting routine library in BASIC 4—2406
gravimetry and magnetics inverse problem, simultaneous soln. by nonlinear programming, Fortran 4—18879
half-tone representation of 3-D objects illuminated by area sources or polyhedron sources 4—22455
related Hankel transform numerical integration by quadrature and continued fraction expansion in FORTRAN 4—18777
Helmholtz equation package 4—1386
IBM Personal Computer, accessing system and hardware facilities 4—9247
Junior Computer Basicode-2 interface and VDU Card subroutines 4—17259
linear equation with symmetrically skyline-stored nonsymmetric matrix, soln. FORTRAN IV routines 4—1364
machine language input routines for Commodore computers 4—5915
MACRO subprogram for time elapsed between dates 4—19437
MACRO-11 programming, helpful subroutines 4—5693
memory saving in the ZX-81 4—2480
microcomputers' use of ATARI PILOT for programming language learning, in BASIC 4—3710
modular compiler-building methodology based on subroutines set in FORTRAN 4—22571
molecular dynamics FORTRAN programs, vectorisation using Cyber 205 processor 4—9906
MOST model for NAP2 program implementation, DC characts. and transient response 4—14376
multi-exit loops, in Pascal 4—22306
multiplicative linear congruential pseudo-random number generator 4—10597
numerical inversion of Laplace transforms in FORTRAN 4—21239
numerical methods for the personal computer, book 4—14779
ODE solver, starting step size routine, in FORTRAN 4—1393
PACMO computer-aided design package for microwave devices 4—14438
plane frames, eigensolutions, concise eqns. and program 4—10371
plotting data with character graphics in BASIC 4—10579
Poisson distrib., exact tests of fit, in FORTRAN IV 4—252
portable FORTRAN subroutine for derivatives of psi function 4—14068
printer driver routine for Z80-based microcomputers 4—17950
quadtree medial axis transform in Pascal 4—9107
RSX indirect command file usage 4—17705
self-adjoint elliptic PDEs in 3D space, FORTRAN routines 4—1392
signed arithmetic usage, missed sign comparisons on 6502 computers 4—6814
SLATEC mathematical subroutines, in FORTRAN 77 4—23174
software for relative error analysis in FORTRAN 4—1352

subroutines continued
steady-state circuit anal. problems, computer generation, FORTRAN program 4—14389
time-interval acquisition on a 6502-based microcomputer, machine language 4—14689
timer, assembly language TI 99/4A microcomputer 4—14711
TS-1000 general purpose subroutines 4—3582
unconstrained minimisation using model/trust-region approach 4—14069
unified computer program for iterative solution of systems of linear equations in FORTRAN 4—18907
Unix for Pascal programmers, in Pascal 4—22625
variable-time-delay routine for Z80, in machine code and assembly language 4—2486
vector interrupts for Z80 and 6502 processors 4—17986
VLSI, computational aspects 4—12501
weather prediction, numerical FFT algorithms, in FORTRAN 4—6403
Z80 assembly language sorting routine 4—17743
ZX81 utility to call machine-code subroutines, in BASIC and assembler *(French)* 4—2478
ZX Spectrum BEEP Command routines, in assembler and machine code 4—22301
ZX Spectrum I/O streams and channels 4—22616
ZX-81 draw routine in Basic 4—19428
ZX-Compander text compression routine for ZX-81 in BASIC 4—22425

synchronisation
6809 microprocessor synchronising cct., using same memory for two devices 4−8492
AR6A single-sideband microwave radio system, frequency control equipment design 4−15904
asynchronous arbiter, complex time struct., self-synchronising design and priority aspects *(Japanese)* 4−12418
binary pseudo noise sequences, props., cryptographic systems *(German)* 4−12417
clock extraction for multiphase clock circuits comprising a C-FET MOS latch design 4−1538
clock installations, centrally operated, AF remote control for uniform time indication *(German)* 4−1322
CMOS real-time clock, 146818, interface circuit for nonmultiplexed bus microprocessors 4−1991
code generation, automatic, for Ada resource controller tasks 4−22335
computational concurrency, interprocess interaction in distributed architectures 4−5898
DC motors, revolution number synchronisation *(Hungarian)* 4−15995
deadlock problems, appl. of Boolean algebra and resolution algorithm 4−13546
decision problems related to protection and synchronisation, Nivats' processing system 4−8239
distributed architectures, interprocess synchronisation and communication 4−18032
ECL ICs, clock breakthrough, meas. and computer simulation, reduction methods 4−8313
Fasnet, experimental high-speed local area network transceiver implementation 4−2105
forcing expression, sychronisation mechanism 4−16767
hardware method of synchronising processes without using a clock 4−1531
laser printer scan length servo 4−2219
LMAC system for robot cooperation, synchronisation tools 4−6581
memory address decoding 4−17703
microprocessors, synchronisation principles for LSI chips *(Russian)* 4−8342
microwave oscillators with additional feedback, equivalent circuit and characteristics 4−8095
multiple-wait-state generator to handle slow microprocessor peripherals 4−1532
multiprocessor systems, tagged token dataflow architecture, synchronisation and memory latency aspects 4−8457
new criterion for synchronization of salient-pole synchronous motors 4−3268
new synchronization scheme for microprocessor based real-time control systems 4−22653
parallel processes, algebraic specification of communication 4−13533
parallel processing, optimizing synchronous systems 4−12510
Petri nets controlled by finite automata, deadlock avoidance and conflict resolution 4−16741
program parallelisation, conversion via software of SIMD to MIMD processor 4−13576

synchronisation continued
  protocol consensus in distributed computing, minimal synchronism needed 4—22074
  radio stations, automatic error control system 4—8093
  real-time operating systems, communication and synchronisation *(German)* 4—13528
  ring network environment, asynchronous, variable-length data packets, data sync. 4—2074
  rotating prism drum camera, speed control using electrical synchronisation 4—16523

- monographs, subject description 4—9789
- multilingual, Universal Decimal Classification and terminology 4—3034
- psychology documentation *(Spanish)* 4—3041
- registration of, for Czechoslovak STI *(Czech)* 4—9786
- representation of knowledge by informatic media: databases and semantic methods *(Spanish)* 4—13986
- ROOT Thesaurus in library management 4—18623
- search languages in GDR *(German)* 4—18671
- social sciences 4—3037
- special library interfacing problems 4—23060
- THES/BID: a thesaurus for juridical informatics and the law of informatics, compiled with the aid of electronic data processing *(Italian)* 4—13790

thick film circuits
- hybrid IC, thick film multilayer, CAD system for layout and testing 4—14394
- hybrid IC, trimmed resistors, CAD-moderate RESISTOR, iterative algorithm for characts. evaluation 4—3322
- hybrids, thick film, computer controlled direct writing equipment, design and operation 4—1080
- multilayer thick film circuits, automatic high speed visual inspection system 4—14391
- Northcon/82 conference record, Seattle, WA, USA (May 1982) 4—2095
- printing installation, programmable automata for control *(French)* 4—1115
- SAW optimal filter, CAD and fabrication *(German)* 4—19011
- sensors for automotive electronics 4—772
- solder paste screenability, rheological evaluation using Ferranti-Shirley viscometer 4—11818
- thermal print head using large scale hybrid thick film 4—2231

thick film devices
- gas sensor, miniaturised self-contained, hybrid microelectronic techniques 4—774
- humidity sensor using thick film dielectric 4—775
- sensors and their integration 4—776
- sensors of temperature, humidity and velocity 4—11556
- thermal printhead with drive ccts., temp. control *(Japanese)* 4—710

thick film resistors
- air-fireable Ni-P inks for thick-film resist. temp. sensors 4—11555
- hybrid IC, trimmed resistors, CAD-moderate RESISTOR, iterative algorithm for characts. evaluation 4—3322
- hybrid IC CAD, thick film resistor design, models 4—14390
- thermal heads and thick film 4—13172
- Ru-based, finger cots: protectants or contaminants? 4—11819

thickness control
- closed loop control design for 7-stand hot strip rolling mill 4—11803
- cold rolling, comparison of thickness control systems 4—16214
- ENCOPANEL hot strip mill insulation system 4—16215
- extrusion blow moulding processes, monitoring by microcomputer *(German)* 4—4663
- magnetic recording ink coating thickness control, sample-and-hold technique 4—7592
- paper machine computerised control, using on-line caliper gauge 4—1106
- rolling mills, automatic gauge control *(Japanese)* 4—4537
- rolling mills, automation, effect of computerised control on productivity at Biache *(French)* 4—16224

thickness measurement
- automatic part thickness measuring and sorting system 4—7905
- beta-ray backscatter thickness measurement microelectronic fabrication and control appls. 4—12133
- cling film thickness testing using modular IBIS 4—16603
- coatings, quality control and inspection 4—15906
- fluorocarbon lubricant films on mag. disk media, thickness determ. by FT IR spectroscopy 4—8527
- newsprint machines, cross-direction caliper control 4—7991
- portable thickness meter for car bodywork coatings 4—13837
- sawn timber automatic edging using microcomputer controlled system *(German)* 4—1102
- vacuum deposited coatings, deposition monitoring using Kalman filter 4—11864

thin film capacitors
- No entries

thin film circuits
- attenuators, C-band type, analysis using Super-Compact CAD software program 4—3272
- hybrid IC, thin film type, computer controlled laser trim/test system 4—1081
- photolithography, modular process control system for thin film cct. production *(Russian)* 4—7949
- thermal print head for colour printing 4—2232

thin film devices
- *see also magnetic thin film devices*
- CRT faceplate optical keyboard device and technique 4—8896
- pressure transducer for high precision temp. control *(German)* 4—11561
- sensors using thin film techniques *(Japanese)* 4—11568

thin film resistors
- Ni thermoresistive sensors 4—773

thin film transistors
- No entries

thin film triodes *see thin film transistors*
three phase rectifiers *see rectifiers*
three-term control
- automation systems, standard algorithm and PID algorithm compared *(German)* 4—7620
- control valve hysteresis and process non-self-regulation, comparison of Smith predictor and PID controller 4—11957
- controller adaptability, adaptive control system parameters adjustment 4—11425
- Digistrip IV and Digi-link IV process monitor/control systems 4—717
- digital computer implementation 4—4203
- discrete incremental PID regulator, employing microcomputer *(Norwegian)* 4—8

three-term control continued
frequency response measurement, tuning using-spectral analyser 4—11513
gain scheduling adaptive control appl. *(Japanese)* 4—11434
I-PD controller, design by dominant pole assignment *(Japanese)* 4—20280
microprocessor-based controllers 4—4345
multivariable discrete time systems, design of digital two- and three term controllers 4—4249
multivariable structurally constrained systems design, initialisation problems 4—4234
optimal regulator with scalar multiplier *(Japanese)* 4—15827
PID and I-PD control, transition to modern control *(Japanese)* 4—11383
PID closed-loop control system, microcomputer appl., nonlinear systems *(German)* 4—15935
PID control and programmable automation systems *(French)* 4—16192
PID control systems with reference filter, design method *(Japanese)* 4—7503
PID controller, adaptation of dynamic properties *(Polish)* 4—4342
PID controller, microprocessor based, for DC motor speed control 4—4473
PID regulator, new generation, characteristics of various types and supplier details *(Swedish)* 4—7644
PID tuning and closed loop simulation 4—11787
process controller tuning, open and closed loop methods 4—4653
proportional integral derivative system, direct digital and pulse width modulation control comparison 4—11644
sampling interval selection, PID DASOR 600 system *(Czech)* 4—14552
self-tuning, self-contained PID controller 4—11445
self-tuning feedback controller 4—11444
semimicrobalance, self-compensating electronic anal. *(German)* 4—7651
settings of a programmable PID controller *(Polish)* 4—15967
temperature, computer simulation, stabilization and optimization *(German)* 4—10301
temperature controller IMO/Omron E5K PID 4—4340
train automatic stop control, predictive fuzzy control *(Japanese)* 4—16428
tuning methods *(Japanese)* 4—11384

threshold elements
No entries

threshold logic
cascaded network of threshold elements, capacity upper limit determ. using equivalent transformation technique *(Japanese)* 4—16807
quaternary threshold-logic gate, general purpose 4—8315

thyratrons
proportional thyristor temperature regulator with a thyratron triggering pulse generator 4—20409

thyristor applications
36-thyristor cycloconvertor/synchronous motor combination electric drive, operation and use *(German)* 4—20628
800 kVA current injection type active filter for AC line harmonic suppression 4—944
AC electric locomotives high power factor correction and stepless control 4—4493
AC motor speed control system using GTO convertors 4—934
actuators developments and comparison, for power switching and motor control 4—11579
analysing the dynamic characteristics of a thyristor resonance actuator in a voltage control system *(Russian)* 4—794
application of a thyristor controlled VAR compensator for damping subsynchronous oscillations in power systems 4—20638
arc furnace supply regulation employing thyristorised compensators 4—863
aspects of design of multifunctional fast devices for raising the quality of the electric power *(Russian)* 4—7801
asynchronous machine, PWM invertor-fed, microprocessor control 4—7840
autoadaptive chopper for speed regulation of a wound rotor induction machine 4—20647
automatic digital regulator of reactive power for dynamic compensation equipment *(Russian)* 4—20658
auxiliary power supply for rolling stock 4—4495
bias control processes, harmonics *(Dutch)* 4—11497
breaker, for speed control of electric trucks, electric system, power efficiency 4—16432
continuous dimmer circuit with thyristors and an auxiliary step-up transformer for high intensity discharge lamps *(Japanese)* 4—889
convertor, functional monitoring and diagnostics for a pulsed-phase control system 4—20664
convertor-fed DC motor variable-speed drives model reference adaptive control 4—7837
coordination of static VAR compensators with long distance radial transmission system for damping improvement 4—20640
crane drives, heavy duty container systems *(German)* 4—11614
DC motor, linear elec. drive system, modified modal control *(Polish)* 4—11577
design of controlled switching unit for power system studies 4—7813
development of principles of polyphase thyristor control by pulse width converters *(Russian)* 4—7776
drive control unit using thyristor bridge 4—20643
drives, thyristor operated, control algorithm, variable struct. *(Russian)* 4—16109
electronic commutators, HV, thyristor control systems design principles 4—20662
fluorescent lamp dimmers with thyristor switching cct. 4—4453
frequency changer ccts., using microprocessor based invertor controllers *(Spanish)* 4—10291
GTO inverter for adjustable speed AC motor drive system 4—919
GTO invertor control system, for AC drive transit car 4—7832
HF voltage-clamped power invertors, resonant reactor-energy conditioning loops and control 4—949
high frequency four quadrant chopper controller employing thyristors 4—795
HVDC convertor static var compensator control in AC/DC power system 4—911
improved method of DC dynamic braking of wound rotor induction motor 4—7811
induction motor drives, thyristor phase-frequency controlled, digital models 4—4502
induction motor with rotor resist. discrete control, mathematical model and digital simulation *(Polish)* 4—11578
induction motors, thyristor-diode control circuits 4—11711
invertor, parallel type, auxiliary thyristor bridge circuit, computer simulation, starting conditions analysis *(Rumanian)* 4—10110

thyristor applications continued
Japanese National Railways AC rolling stock thyristor phase control technology developments 4—957
JT-60 nuclear fusion test facilities power supply system computer simulation 4—3261
Leonard equipment, direct digital controlled, state observer, motor speed regulation 4—20689
load-independent commutated voltage source inverter for induction heating 4—11588
microcomputer control of thyristors *(German)* 4—867
motor control using GTO thryistors *(Swedish)* 4—7794
motor speed control ccts., electric drills appl. *(Czech)* 4—4483
multi-operator thyristor-diode converter for manual arc welding *(Russian)* 4—4595
multiphase thyristor motor with DC link for rolling mills *(Japanese)* 4—705
power convertor valves design and control, for /Durnrohr HVDC East/West European back-to-back tie *(German)* 4—896
power convertors, digital simulation *(Bulgarian)* 4—23315
power regulator, pulse-step controlled, energy characts. *(Russian)* 4—20457
power systems, arcs, drives and correction equipment, online harmonic anal. 4—23339
proportional thyristor temperature regulator with a thyratron triggering pulse generator 4—20409
PWM thyristor invertor, 3-phase, having capacitive load, circuit and by computer 4—3262
real-time microprocessor-based DC motor speed controller 4—4375
regenerative bridge power convertors, series connected, sequence control effect on performance 4—11716
regulating unit wave packet method, digital control *(German)* 4—868
regulation of rectified voltage by thyristor-controlled booster transformers *(Russian)* 4—4484
regulation of the reactive power and voltage in a power supply system using fast static thyristor compensators *(Russian)* 4—4481
reverse conducting thyristor, HV, high power, for practical chopper controller in urban transit systems 4—928
single-position welding rectifiers for manual arc welding 4—11740
slip-ring induction motor control, digital simulation *(Russian)* 4—18949
soft-starter fed induction machine simulation 4—3257
superconducting magnets for energy storage, thyristor convertor direct digital control 4—940
surge protection using arc-suppression reactors with phase pulse control in mine networks *(Russian)* 4—873
synchronous generator with thyristor controlled load, performance anal. 4—946
three-phase full-wave thyristor convertor firing circuit, microprocessor based design 4—16172
three-phase thyristor power convertors, digitally-controlled, sync., microprocessor control 4—11681
thyristor dual converter for DC motor drives, cascade nonlinear compensation 4—16171
thyristor frequency converter for frequency control of an electric motor *(Russian)* 4—20670
thyristor-controlled drive for a kiln feeder *(Russian)* 4—11797
thyristor-controlled reactor used as static reactive power compensator, microprocessor control 4—4498
underground railways in Stockholm, thyristor chopper control and regenerative braking assessed *(German)* 4—8016
variable inductor control for improved power system waveforms by harmonics suppression 4—945
variable motor-speed control, general purpose DDC system *(Japanese)* 4—3414
VIC 20 microcomputer, 8-channel mains triac driver, optoisolator 4—13208
voltage regulator for type RUM-20 X-ray diagnostic units 4—1326
winding machine driven by thyristor-controlled DC motor, linear adaptive control analysis *(German)* 4—11690

thyristors
direct digital controlled PWM GTO inverter for DC 1500 V electric cars 4—7831
electronic equipment on rail vehicles *(German)* 4—20945
GTO convertors, advantages in power electronics *(German)* 4—11586
HF voltage-clamped power invertors, resonant reactor-energy conditioning loops and control 4—949
high power, overvoltage self protected, design considerations 4—927
high power semiconductor devices, thyristors, switching devices and combined circuits, future trends 4—20699
low-harmonic SCR voltage controller 4—7799
microprocessor-based programmable temperature control system, design 4—709
motor control using GTO thryistors *(Swedish)* 4—7794
power electronics 83, conf., Tokyo, Japan (March 1983) 4—3224
power thyristors, technical characts. and market survey *(German)* 4—11587
PUMA robot for assembly of thyristors, visual feedback appl. 4—20856
reverse conducting thyristor, HV, high power, for practical chopper controller in urban transit systems 4—928
SCR motor systems, microprocessor algorithm for control 4—4487
voltage control of HVDC convertor, using bypass thyristor valves and potential transformer 4—11723

tidal power stations
basin-tidal power schemes evaluation using analytic optimal control *(French)* 4—11662

tides
EPROM storage, software for user access 4—1720

tilt (Earth) *see geodesy*

tilting control *see attitude control*

time bases
No entries

time delay circuits *see delay circuits*

time delays *see delays*

time division multiplexing
see also message switching; packet switching
ATP-2 self-adaptive multiple-access protocols 4—22110
digital signals group coder for multiplex transmission system with time division *(Polish)* 4—21915
digital switching engineering, fundamentals *(Japanese)* 4—16484

time division multiplexing continued
digital time-multiplex speech switching in telephone exchanges *(German)* 4—1168
Eutelsat, TDMA reference, monitoring and control functions in the European telecommunications satellite system 4—4788
integrated communications controller for demand-assignment 4—4745
Intelsat VI appl. of satellite switch state time plan control 4—8098
Intelsat VI SS-TDMA system, network timing and control 4—4790
LAN token-passing schemes 4—12938
local area networks, hybrid TDMA/CSMA accessing scheme, for variable traffic characteristics and operating delay metric minimisation 4—5487
local area networks, optimal hybrid multi-access protocols 4—22108
magnetic bubble detectors 4—5225
module for telephone switching systems appls. 4—8065
movable slot TDM characteristics 4—22070
multi-microprocessor architecture for switching voice communication lines 4—1203
overview 4—21947
program status latch 4—1160
satellite ground station TDMA Simulator for training technicians 4—6548
SILK buffer insertion ring LAN 4—21967
speech path network configuration using LSIs and integrated optical transceiver module 4—1201
TDMA, adaptive forward error correction techniques 4—8099
Universal Communications Controller design package 4—3394

time-domain analysis
aggregation method applied to model reduction of multivariable systems algebra-geometric approach 4—10978
filter rectangular pulse train output, time charact. *(French)* 4—23497
MOSFET circuits, waveform relaxation scheme, robustness aspects 4—23467
sampled data systems zeros, relations with continuous time systems 4—20331
shape identification by time- and frequency domain anal. of transient-radiation and scattering 4—15446
SWITCAP, switched-capacitor network anal. program features 4—3306

time domain networks *see time-varying networks*

time-domain reflectometry
VLSI test system, time interval meas., automatic calibration and hardware/software design 4—21097

time-domain synthesis
active filters, CAD method 4—23384
modal parameter identification and modelling of structures 4—11332
nonminimum phase plants, exact model matching *(Japanese)* 4—634
self tuning control, predictor based 4—20349
steam turbine governors, microprocessor based digital system design 4—11636
voice output terminals development *(Czech)* 4—17582

time interval measurement *see time measurement*

time measurement
see also clocks; frequency measurement; time resolved spectroscopy
BBC Microcomputer as event timer, BASIC program 4—6803
British Telecom speaking clock, appl. 4—1239
computerised US time delay meas. system using EM acoustic transducers 4—4849
electronic watch packages, CAD *(French)* 4—10157
IC design techniques, timing verification 4—8382
machine language millisecond timers for the Z-80 microprocessor 4—14688
microprocessor-compatible clock and display multiplexer integrated circuits, CMOS technology *(German)* 4—5057
programmable counter/timer for system applications *(Italian)* 4—21078
psychological expts., advantages of machine language over BASIC for timing 4—6677
quartz terminal, single analogue, test system *(French)* 4—12148
quartz watch reliability test system using personal computer 4—12147
sidereal and solar clock controller 4—15908
time-interval acquisition on a 6502-based microcomputer 4—14689
VLSI test system, time interval meas., automatic calibration and hardware/software design 4—21097

time of flight spectrometers
automatic control and timing unit 4—8160

time projection chamber *see proportional counters*

time resolved spectroscopy
boxcar averaging advances using digital techniques 4—14107
EXAFS technique, microcomputer-controlled system 4—8164
Ne, hollow cathode discharge tube, time-resolved spectral measurement by. photon counting method 4—16566

time series
analysis using convex programming 4—15171
ARMA models, system order estimation by ladder canonical forms 4—10914
ARMA spectral estimation based on partial autocorrelations 4—11129
ARMA systems, minimax estimation 4—346
CGTSA computer program for time series analysis, matrix operations, and data manipulation 4—9878
confidence interval estimation using standardized time series 4—15185
CRONOS-Eurostat statistical databank interface to SAS 4—19269
econometric time series on DIALOG 4—18739
EEG sequential time series segmentation algorithms, comparative study 4—23253
exponential smoothing parameter, evolutionary operation 4—15575
forecasting accuracy, recursive Kalman filter forecasting 4—15441
forecasting with adaptive gradient exponential smoothing 4—7328
interrelated logistics performance variables, time series analysis 4—15750
LABSTAT database and software system 4—19264
least squares lattice algorithms, pure time updates 4—3971
manual control, contribution of congruent pitch motion cue to human activity 4—15520
meta data: an experience of its uses and management 4—19266
multiresolution images, representation using time series models 4—4063
neural spike trains anal., appl. of Markov dependency based on Shannon's entropy 4—20225
scanning frequency meter digital processor 4—11147
survival curves and scrappings *(Hungarian)* 4—15679
Texas financial forecasting, time series analysis appl. 4—7379

time sharing computer systems *see time-sharing systems*

time-sharing programs
IBM's MVS time sharing option network workload characterisation and modelling 4—17306
multiobjective nonlinear programming problems, interactive fuzzy decision making *(Japanese)* 4—19858
multitasking microprocessor level instructions, interval timer interruption program 4—9311
Tools: an environment for time-shared computing and programming 4—5885
UNIX, time-sharing operating system for programs development 4—2553

time-sharing systems
AIDE interactive display environment 4—1942
distributing computer power, timesharing or microcomputer networks 4—8777
generalized software-workbench, time-sharing system, program development 4—22371
multiprocessing, time-shared floating-point unit system, architecture, scientific appl. 4—1905
partially circular cyclic servicing algorithm, mean response time 4—12717
passwords, new techniques for user identification *(Hungarian)* 4—2401
problem solving by different computers in a computer complex, use of time sharing *(Ukrainian)* 4—638
subsecond response times, TSO transaction rates 4—13507
tradeoffs between timesharing and dedicated computers in a medical setting 4—10011
UNIX time sharing system, data acquisition with PDP-11/44 and MBD-11 branch driver 4—14113

time switches
multiuse thermostat using Motorola MC146805E2 CMOS microprocessor *(Italian)* 4—708
new motor driven and electronic time relays 4—745

time-varying circuits *see time-varying networks*

time-varying networks
higher-index linear time-varying singular systems, canonical form, analytic and numerical solns. 4—10973

time varying parameters *see time-varying systems*

time-varying systems
absolute stability criterion, derivation using nonlinear transformation technique 4—4207
adaptive bootstrap estimation algorithm with application 4—416
block pulse function appl. in identification of parameters of nonlinear time-varying systems 4—385
Brownian motion, optimal control 4—15867
data transmission, dynamic properties 4—15468
differential delay systems identification, computational aspects 4—11460
digital image processing for time-varying scene anal. 4—14498
dynamic system simulation, parallel multiprocessor system 4—7564
dynamic systems with coordinate parametric and parametric feedback, free motion control 4—7560
evolutive systems, tree structure parameters, choice and determination *(Polish)* 4—19968
feedback system design, rational transfer function model 4—626
forecasting accuracy, recursive Kalman filter forecasting 4—15441
higher-index linear time-varying singular systems, canonical form, analytic and numerical solns. 4—10973
identification of deterministic linear system with variable time-delay 4—387
identification of linear time varying differential systems amid modal disturbances 4—386
linear, asymptotic stability 4—20365
linear analytic systems, controllability discrimination method *(Japanese)* 4—20370
linear multivariable feedback systems, relationship between L^p stabilities 4—11454
linear systems, analysis and optimal control via Chebyshev polynomials 4—7561
linear systems, balancing and model reduction 4—4265
linear systems, controllability criterion, appl. of qualitative maximum principle 4—11361
linear systems, generalised balanced realisations 4—4266
linear systems, stability criterion 4—15869
linear systems, stability of reduced models 4—20360
linear systems with time varying delay, Walsh series solution 4—7571
linear systems with uncertain dynamics, robust filtering and prediction, game theoretic approach 4—3935
linear tracking systems with time delays, suboptimal control 4—11468
nonlinear systems with distributed delays in control, sufficient conditions for global relative controllability 4—15894
nonparametric identification and prediction 4—19993
nonstationary dynamic systems with coordinate-parametric feedback, control 4—20363
on-line identification and steady-state optimization of nonstationary dynamic objects 4—389
optimal finite-dimensional recursive identification in a polynomial output mapping class 4—15317
optimal synthesis of functioning mechanism of an active system 4—15263
passive and active linear systems with time varying parameters, distributional postulates *(Russian)* 4—7179
regulator for linear systems with delay, robustness *(Japanese)* 4—20372
singularly perturbed linear discrete time systems, difference approximation 4—7543
structural identifiability of dynamical systems 4—378
suboptimal stochastic control, discrete-time nonstationary systems 4—11399
telephone network, echo paths, origination and identification 4—15873

timing *see time measurement*

timing circuits
555 timer IC for reducing electromechanical counter power 4—5059
AHPL-like control sequence description, realisation by decomposition 4—8266
asynchronous clock switching filter for DASD 4—1537
BBC darkroom timer 4—1980
data acquisition, linear CMOS ICs 4—2131
hardware timer frees CPU for other tasks 4—21484
MC68HC11 microcomputer timer system 4—12455
microelectronic systems, book 4—1703
monitor circuit to reset microprocessor after brownouts 4—8337
motor timing control circuit 4—7806

timing circuits continued
  multiple-wait-state generator to handle slow microprocessor peripherals 4—1532
  pipelined networks, NlogN and crossbar topologies, VLSI based, timing control 4—5138
  PM 6652/4 timer/counters, using slave/master combination microprocessors 4—8138
  pneumatic logic timer, air flow control without external reservoir 4—20481
  programmable counter/timer for system applications *(Italian)* 4—21078
  proportional AC control, using 555 IC timer ccts. 4—694
  selective clock stretching with Z8581 clock oscillator and controller 4—8358
  stepping motor concurrent drive by microprocessor-programmed timers 4—4368
  time and temperature control by a 4-bit microprocessor 4—989

  - 48K Spectrum tape backup program 4—10575
  - 64 character creator 4—5872
  - 6502 assembler routine, listable autostart program *(German)* 4—17938
  - 6502-based systems program analysis software in machine code 4—17957
  - address list sorting and storage, program listing, in BASIC *(French)* 4—13276
  - advanced electronic warfare test set, dual-port ATE, ATLAS program generator 4—21133
  - Apple II, menu-driven utility program, in BASIC 4—10539
  - Apple speech synthesizer S.A.M. software package 4—17577
  - Apple/IBM communication, file transfer programs 4—17932
  - Atari Disk Detective, string location utility 4—9248
  - Atari interrupt handling routines 4—17985
  - Atari master disk directory 4—5868
  - Atari programmable character editor, in BASIC 4—17945
  - Atari safe RAM 4—6801
  - Atari screen editor, in BASIC 4—17944
  - ATLAS ATE test programs, GO-NOGO testing, LASAR output data 4—21134
  - bad blocks in data cartridges, using RT-11 with discs 4—5216
  - BASIC PLUS 2 under RSTS/E, special function keys 4—5878

utility programs continued
Basicode-2 4—2484
Basicode-2 interface for the Junior Computer 4—2485
BBC microcomputer graphics handling utilities 4—14772
cassette data file program for ZX81 4—2482
catalogue sorter program for Apple microcomputers 4—22582
character conversion utility, MXLATE 4—5882
character editor program for Commodore 64 and VIC 20, in BASIC 4—17942
character generator with umlauts and reverse video, BASIC listing *(German)* 4—13479
chemical symbols and special characters for Apple microcomputer, utilities 4—22576
Commodore 64, word counting program, screen print utility, game, and test generating package 4—22578
Commodore DRAW program, in BASIC 4—17941
Commodore EXEC 4—5867
Commodore microcomputer, machine code routine, graphic character conversions 4—22438
Commodore program loader and diskette directory scroller, machine code routine *(German)* 4—9250
communication between jobs, using resident library 4—5874
control code generation and error correction subprograms *(Czech)* 4—2408
CP/M commands using Menu 4—9251
CP/M utilities 4—17934
cursor control and CP/M for dumb terminals, program in assembly language 4—17974
curve-tracing using printer, BASIC program *(French)* 4—13478
data transfer control program for microcomputer *(Japanese)* 4—9234
disc drive alignment verification, Digital Diagnostic Diskette 4—17933
disk dump program for Apple microcomputers 4—22583
Disk Explorer for Commodore, in BASIC 4—13483
disk handling routines 4—2481
Display Manager programming utility from Digital Research 4—9254
displaying PET's keyboard matrix 4—5883
document generator programs *(Polish)* 4—17948
DOSPLUS, utility functions for Commodore 64 4—22584
EPROM, loading of BASIC programs *(French)* 4—13477
Epson HX 20 ROM disassembler program, in BASIC 4—13480
file copy utility CPY for NOS on Cyber 835 computer 4—22580
file protection, encryption program in Z80 and 6502 machine language and BASIC *(French)* 4—22575
File Routing Package utility for file storage and sending in NET 1000 service 4—22585
file transfer handling packages 4—2492
Flex utility program for removing names from your discettes *(French)* 4—17930
FORTRAN subroutine from OMSI PASCAL 4—2487
gOLEM V.3.2 *(Slovak)* 4—9252
graphics, high resolution, for Commodore 64 4—22436
graphics display commands for 16K and 48K spectrum, utility program 4—22424
graphics routine for Commodore microcomputers, in BASIC 4—22437
Hershey character font generation on microcomputers and plotters 4—8909
hexadecimal code for CBM, sorting diskette directory *(German)* 4—13488
hexadecimal machine code for 8080 and 8085 programs *(German)* 4—13487
hi-res characters for Logo 4—6811
IBM Application Development Facility 4—17951
IBM Interactive Presentation Graphics 4—17952
IBM Pascal software support package 4—2479
IBM PC keyboard enhancer program, Prokey 4—13489
IBM/Apple communication, file transfer programs 4—17932
IDMS database system, users' experiences *(Czech)* 4—22696
invisible disk directory for VIC and 64 4—5869
keyboard and disc utility programs 4—22577
List and Scroll, BASIC program debugging aid, in BASIC 4—13493
Lower Case, machine code program for Dragon 32K 4—23761
machine language entry program, in BASIC 4—13482
machine language program comparison, in BASIC 4—13485
MAPGRF program for graph generation in overlay design 4—5875
memory saving in the ZX-81 4—2480
menu input generating system for Fortran programs 4—9253
merging BASIC programs from Commodore disk 4—5866
microdrive Sinclair utilities, practical use 4—21690
Microtools, unix-style software tools for CP/M 4—5865
monitor utility program for development of routines *(French)* 4—17931
multicolor Atari character editor 4—5870
OCR acquired documents processing *(Czech)* 4—5884
Oric-1, tape verifying, machine code routine 4—10558
Pet to BBC, program interface in BASIC 4—13490
plot library for IEEE-488 GPIB, FORTRAN programs 4—5864
precompiled Forth modules 4—2513
printed reports programming in COBOL, in MOS and DMOS systems *(Czech)* 4—2490
printer driver routine for Z80-based microcomputers 4—17950
printer profile utility, display of invalid entries as parameter choices, scrolling prevention 4—2489
printing and other operations simultaneously, program in assembly language 4—17937
Progaid toolkit program for ZX-81 4—22581
program analysis, Document utility program, in BASIC 4—22579
recovery system for RSTS appls., design process 4—5908
renumbering of ZX81 BASIC program lines, machine-code listing *(French)* 4—5862
RSX11M Connect to Interrupt Vector Directive 4—5879
RSX software conversion to run on Professional computers 4—5881
RT-11 and CTS-300 sorting, review 4—5876
RTE-A, operating system for HP 1000 A series computer systems 4—22629
screen editor program for Commodore computers, in BASIC 4—17763
screen editor program for the Apple, in BASIC 4—17947
screen editor program for TRS 80C, in BASIC 4—17943
screen output handling, Display Manager review 4—2491
Sharp PC-1500, new instructions *(German)* 4—13396
SMEP series user utility program functions and development *(Czech)* 4—13486
Software Tools package, for Unix capabilities on nonUnix systems 4—9215
Son of Lister, lists a BASIC program, in BASIC 4—13484

utility programs continued
space saving programming technique 4—2483
step and trace for Apple II and Apple IIe *(German)* 4—17939
structural dimension calculations, addition and subtraction of feet and inch dimensions, in BASIC 4—18780
SuperBASIC, 37 new commands for the VIC 64, in BASIC 4—13481
TIMECHange.BAS program to set RSTS/E system clock 4—5880
Tools: an environment for time-shared computing and programming 4—5885
TRS-80 as PDP-11 terminal, assembly language program 4—5863
TRS-80 or Videogenie micro, assembler routine for string variables storage *(German)* 4—9249
UNIX to CP/M floppy disk file conversion 4—9290
variable-time-delay routine for Z80, in machine code and assembly language 4—2486
VIC-20 program protection 4—6799
VTMODEM multifunction communications program for CPM operating system 4—5877
whole numbers conversion to string representations, coding 4—5873
word processing software failure debug, utility program appl. 4—17949
word processing with Apple Pascal 4—2488
XBASIC, SAM and telecommunications for the Atari 4—17946
ZX81 utility to call machine-code subroutines, in BASIC and assembler *(French)* 4—2478
ZX-81 to Spectrum program converter 4—17936

u.v. astronomy *see ultraviolet astronomy*

u.v. detectors *see ultraviolet detectors*

UV lithography *see photolithography*

vacuum apparatus
includes apparatus for producing, maintaining and handling vacuum per se
see also vacuum gauges; vacuum pumps; vacuum techniques
switchgear, computer model for switching surge phenomena analysis 4—14347

vacuum control
No entries

vacuum deposition
used for EVAPORATED layer production in vacuum
material evaporation under vacuum conditions, effusion cell for accurate control 4—21160
monitoring thickness of deposit using Kalman filter on a reflected infrared beam 4—11864
optical coating vacuum equipment automation 4—3407

vacuum gauges
see also manometers; vacuum measurement
No entries

vacuum measurement
see also vacuum gauges
No entries

vacuum pumps
manufacture, increased throughput using CNC 4—1003
manufacture, phase-by-phase introduction of CNC 4—1004

vacuum sintering *see sintering*

vacuum techniques
includes techniques for producing, maintaining and handling vacuum per se
effusion cell for accurate control of material evaporation under vacuum conditions 4—21160

vacuum tubes
see also diodes
No entries

value analysis *see value engineering*

value engineering
see also operations research; optimisation; quality control
computerised gas dispatch control system specification 4—817
cost engineering application of CAD 4—14261

valve voltmeters *see voltmeters*

valves

automobiles, electronic engine control, microprocessor driven air by-pass valve for idle speed control 4—16401
Burkert valves for poisonous fluids *(Italian)* 4—15982
control valve installation, maintenance and troubleshooting 4—4380
control valve selection principles 4—803
control valves in optimized systems, factors to consider 4—4381
controlling steam pressure and temperature 4—11637
diaphragm valves as regulating valves *(Dutch)* 4—20528
electro-hydraulic directional control valve, featuring integral flow feedback 4—20529
electro-hydraulic floating disc valve 4—11594
electrohydraulic valves, direct digital control 4—16002
flow fuse, nonstick hydraulic type 4—11598
flowrate prediction through control valves, difficulties 4—4379
higher linkage blocks in hydraulic control cycles *(German)* 4—801
hydraulic and fluid control valves 4—16003
hydraulic components with proportional control *(French)* 4—798
hydraulic components with proportional control *(French)* 4—20530
hydraulic control, proportional systems 4—15931
hydraulic servovalve design for maximum pressure sensitivity 4—11595
hydraulic servovalve operation outline 4—784
hydraulic system energy conservation by relief valves and load sensors 4—4436
hysteresis, comparison of Smith predictor and PID controller 4—11957
injection moulding machines using proportional valves *(German)* 4—4384
low-flow valve sizing and selection 4—4382
membrane-type electromagnetic valves *(Bulgarian)* 4—7700
microcomputer-controlled test stand for brake valves *(German)* 4—4859
noise in control valves, calculation *(Dutch)* 4—4363
pneumatic control equipment, use of microprocessors *(French)* 4—800
pneumatic counting circuit, single cylinder 4—11551
pneumatic piston positioning accuracy improvement, using microprocessor 4—804
pneumatic press safety valve with dynamic self-monitoring *(German)* 4—16004
pneumatic sequencing ccts., fast design 4—4348
power modulation and control devices 4—11599
pressure and wetness control using valves *(Spanish)* 4—7699
pressure relief values 4—16006

valves continued
- proportional hydraulics in the synchronisation of movements of a folding press *(French)* 4—799
- proportional regulating valves for plastic injection moulding press *(German)* 4—805
- proportional solenoids, force hysteresis *(German)* 4—7673
- PROVAN, proportional valve control input card for digital controls *(German)* 4—4383
- response of control valves, errors from nonlinearity *(Italian)* 4—20527
- robot, hydraulically driven, thermodynamic efficiency, control strategies 4—12241
- sizing program for HP-67/97 calculator 4—14636
- solenoid control ICs, used for electronic injection, valves, DC motors *(Italian)* 4—15983
- solenoid design factors and developments 4—7680
- solenoid type, Y-body, with solid state positioner and linear variable differential transformer 4—7687
- solenoid valves for pneumatic appls. *(German)* 4—802
- solenoid valves for space technology *(German)* 4—7674
- trends in valves 4—11589
- underfloor heating systems, control 4—843

valves (electronic) *see electron tubes*

Van de Graaff accelerators
- No entries

Van de Graaff generators
- No entries

Van der Pol oscillators *see relaxation oscillators*

vapour deposition
- *see also chemical vapour deposition; sputtering; vacuum deposition*

- computer aided design of split power hydrostatic transmission systems 4—23599
- driver and traffic controller performance rel. to selective attention and motivation *(Italian)* 4—11160
- freight trains, tracking and control using multivariable PI controller 4—12003
- ground transportation, active controls, state of the art and future potential 4—4686
- IEC-bus controlled test set up for VDE/CISPR interference meas. *(German)* 4—12163
- loading and unloading of road and rail-mounted vehicles, automation possibilities *(German)* 4—4395
- motion control of intelligent unmanned vehicle systems 4—21203
- rail vehicle dynamics appl. of nonlinear limit cycle analysis 4—12001
- rail vehicle ride control, lateral active pneumatic suspensions 4—12002
- tractor control systems *(Japanese)* 4—4388

velocity control
- 12 V motor, PWM control circuit for RPM stabilization *(German)* 4—16130
- AC drives, direct current control using pulsed frequency convertors 4—7817
- AC motor speed control system using GTO convertors 4—934
- AC variable speed drive systems technology and current trends 4—920
- active-synchronization control system for DC linear motor 4—1138
- Adaptive braking routine in a digital servo motor control system 4—11714
- air-to-water heat pump, control algorithms 4—7750
- articulated robot, software servo-system *(Japanese)* 4—16614
- asynchronous machines, energised, microprocessor based digital speed control system *(French)* 4—16150
- asynchronous motor operation in generator mode, in hydroelectric power station *(Czech)* 4—16120
- asynchronous slipring motor, current rectifier cascade arrangement for rotational speed control *(German)* 4—7790
- autoadaptive chopper for speed regulation of a wound rotor induction machine 4—20647
- automobiles, electronic engine control, microprocessor driven air by-pass valve for idle speed control 4—16401
- automobiles, optimal speed control, microprocessor appl. *(Japanese)* 4—1133
- automotive engine speed control using microprocessor for enhanced life 4—16408
- automotive engines, idle speed control 4—11649
- automotive speed control devices, design and fuel economy aspects 4—16409
- bogie drive, parallel connected induction motors fed by invertor, improvement of dynamic behaviour 4—7830
- centrifugal pumps, speed controlled, dynamic performance *(German)* 4—7844
- closed loop control design for 7-stand hot strip rolling mill 4—11803
- commutatorless motor drives microprocessor-controlled speed regulator 4—943
- computer controlled electric drives employing velocity and current feedback *(Russian)* 4—7800
- contactor type new 3PK4 controllers for three phase slipring motors 4—859
- controlled feed drives *(German)* 4—20519
- convertor motor, variable-speed, design theory *(German)* 4—11678
- current impressed voltage source inverter fed induction motor control by field orientation 4—7769
- current source invertor induction motor drive optimal efficiency control 4—921
- DC electric drives, digital speed and current control using microcomputers *(German)* 4—7787
- DC fan motors, speed control cct., temp. sensitive 4—703
- DC motor drives for robot arms, torque limited speed control 4—4434
- DC motor electronic speed regulator, used for fractional horse power machines *(German)* 4—4309
- DC motor torque-speed regulation based on load torque estimation method 4—954
- DC motor variable-speed drives model reference adaptive control 4—7837
- DC motor velocity control using current mirror current source 4—7805
- DC motors, brushless, small, advantageous features and industrial applications *(German)* 4—11679
- d.c. motors, speed control using switching controller RC 4193 *(German)* 4—15992
- DC motors, speed regulation systems using microprocessor digital control, comparative study *(French)* 4—16145
- DC motors, speed regulation using microprocessors, three applications outlined *(French)* 4—16144
- DC rectifier drive direct digital subordinate control *(Russian)* 4—20612
- DDC AC machine-tool spindle invertors, trends *(Japanese)* 4—706

INFORMATION TECHNOLOGY and the AUTOMATED OFFICE

Of the many thousands of vitally important articles to be published throughout the world on Information Technology and the Automated Office during the next twelve months

HOW MANY WILL YOU SEE?

....

IT FOCUS—the *NEW* monthly digest

IT FOCUS

... scans the published information

... selects the significant facts and opinions

... and presents time-saving summaries for the busy executive.

IT FOCUS covers all aspects of IT:

... hardware, such as micros, word processors and local networks

... communication systems, e.g. tele-conferencing, viewdata and electronic publishing

... applications: to business, the professions, industry, education, health care, etc.

*For more details of **IT FOCUS**, contact us at one of the addresses below:*

ELECTRICAL & ELECTRONICS ABSTRACTS

The Complete information Service for the Electrical and Electronics Engineer

Coverage

Over 60,000 references are included each year. These are selected by scanning over 3,000 journals and the proceedings of over 1,000 conferences.
In addition coverage is given of books, reports and dissertations.

What Information is Included?

Each reference in Electrical & Electronics Abstracts includes the following information:
Title of paper
All authors' names and affiliation of first author
Source of paper (eg name of journal, volume and issue number, page numbers and date of publication)
100-150 word abstract.

Ease of use

Careful classifying and indexing of entries puts information at your fingertips. References are classified under 250 headings, allowing you to go straight to the information of most interest to you. (A summary of the classification appears in every issue).
These six separate indexes are included in each issue:
Subject guide
Author index
Bibliography index
Book index
Conference index
Corporate author index
The above indexes are cumulated at six-monthly intervals. The author and subject indexes are also cumulated at four-yearly intervals*.

Do You Have Access to This Important Journal?

Does your library or information service provide you with access to this important journal? If not, ask your librarian to contact INSPEC for a free sample and subscription details or write to us direct.

(*four year cumulative indexes not included in annual subscription price)

CUMULATIVE INDEXES

Cumulative indexes are available for *Physics Abstracts. Electrical & Electronics Abstracts* and *Computer & Control Abstracts*, for both authors and subjects. These cumulations generally cover a period of four years, with the exception of *Computer & Control Abstracts* where the initial volume covered the period 1966–68. The table below shows the prices and periods for the two types of cumulative index.

	PHYSICS ABSTRACTS		ELECTRICAL & ELECTRONICS ABSTRACTS		COMPUTER & CONTROL ABSTRACTS	
	Subject £	Author £	Subject £	Author £	Subject £	Author £

ORDERING PROCEDURE

THE AMERICAS

North (including Canada), Central and South

All orders from the above areas, and orders from members of Insititute of Electrical and Electronics Engineers Inc. anywhere in the world, should be sent to Fulfillment Manager, Institute of Electrical & Electronics Engineers Inc., 445 Hoes Lane, Piscataway, N.J. 08854, USA. Telephone (201) 981 0060.

日本：

INSPEC 刊行物の購入価格は、すべて円建てとなっており、航空便(ASP扱)で送られます。詳細については、最寄りの洋書取扱店又は、総代理店ユサコ株式会社（昭和58年10月1日より社名変更）〒105 東京都港区新橋1-13-12 電話(03)502－6471までお問合わせ下さい。

REMAINDER OF THE WORLD

All remaining subscriptions should be sent to INSPEC Marketing Department, P. O. Box 26, Hitchin, Herts., SG5 1SA, England. Telephone Hitchin 53331, Telex 825962, IEE G.

OTHER INSPEC SERVICES

SDI

(Selective Dissemination of Information.) This is a service individually tailored to the requirements and interests of the engineer or research worker. Details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC Database. Information is dispatched weekly on 150 mm × 100 mm (6″ × 4″) cards.

TOPICS

This is an SDI service based on standard profiles. There are over 90 subjects covering high-activity areas of research and devlopment. This is an inexpensive card service designed to alert engineers and researchers to the availability of literature within their subject area.

MAGNETIC TAPES

Tapes containing all the information included in the INSPEC publications are issued twice monthly. They enable the larger research and development organisations to produce their own internal information and current-awareness services.
